# Executive Summary

## Introduction

The long-term objective of this Analysis of Impediments to Fair Housing Choice (AI) is to make fair housing choice a reality for residents of the Broward County HOME Consortium through the prevention of discriminatory housing practices. One goal of the study is to analyze the fair housing conditions in the county and assess the degree to which fair housing choice is available for area residents. A second goal is to suggest ways to improve the level of choice through continued elimination of discriminatory practices.

This report includes an analysis of various demographic, economic and housing indicators, a review of public and private sector policies that affect fair housing, and a review of the county’s efforts to affirmatively further fair housing (AFFH) per federal law. The report provides six key sections: 1) Community Profile; 2) Public Sector Analysis; 3) Private Sector Analysis; 4) Fair Housing Profile; 5) Impediments to Fair Housing Choice; and 6) Recommended Actions to Address Impediments.

Broward County developed the HOME Consortium in 2002 for the purpose of providing safe, decent and affordable housing to low- and moderate-income citizens. The county serves as the lead entity for the Consortium, managing the program, funding applications and distribution of funds. It is also responsible for preparation of the Five-Year Strategic Plan. HOME participating cities include the following: Coconut Creek, Coral Springs, Davie, Deerfield Beach, Lauderhill, Margate, Miramar, Pembroke Pines, Plantation, Sunrise, and Tamarac. The geographic areas served under the County’s CDBG program are the Urban County Participating cities Cooper City, Dania Beach, Hallandale Beach, Hillsboro Beach, Lauderdale-by-the-Sea, Lauderdale Lakes, Lazy Lake, Lighthouse Point, North Lauderdale, Oakland Park, Parkland, Pembroke Park, Southwest Ranches, West Park, and Wilton Manors. The unincorporated areas of central Broward County are also served. They include neighborhoods such as Boulevard Gardens, Washington Park, Franklin Park, and Roosevelt Gardens.

The Broward County HOME Consortium has taken steps to promote fair housing choice and to address affordable housing shortages by adopting policies that are in line with the principles of the Fair Housing Act. The county promotes fair housing and educates leadership, staff, and residents on what U.S. Department of Housing and Urban Development (HUD) defines as fair housing and discrimination in housing. These efforts are necessary to qualify for HUD entitlement grants. Further, the HOME Consortium has identified what steps it must take to overcome identified barriers and avoid the consequences of not adhering to non-discrimination and fair housing laws.

## Overview of Findings

Housing in the Consortium varies by location, but there are some underlying and shared needs and challenges. Residential housing stock near coast is often older and there are more vacancies in the market. Affordability remains a key factor in choosing where one resides. Cost burden is a major problem for residents, particularly renters who are at greater risk of housing instability. Renters with severe cost burden are at risk of homelessness. Even with the increase in the number of rental units over the past several years, rents have continued to climb significantly in the region, reflecting national trends. This increase indicates that demand is high for rental units, and there remains a pressing need for more affordable units.

Countywide, there are approximately 1,909,151 people, which represents 17.6 percent growth since 2000. Most of the growth occurred in the past 10 years which is representative of the state of Florida's population growth. When a population grows more quickly than the housing stock the overall demand increases, which puts upward pressure on housing prices. Increased prices make it more difficult to locate affordable, safe and secure housing, particularly for lower income households.

The report provides an analysis of the most recent data available from the Home Mortgage Disclosure Act (HMDA) database, providing insight into the mortgage lending practices and trends in the region. Mortgage lending activity in the county, much like the nation overall, has improved in the wake of the housing crash, the 2008 recession, and the subsequent economic recovery. Home purchase originations nearly doubled between 2011 and 2017, suggesting signs of growing housing demand and a housing market recovery within the County. Government-insured mortgages have increased, consistent with tighter credit conditions and a more active regulatory environment in the wake of the housing crash.

But even as home purchase activity has increased, barriers to fair housing choice persist for low- and moderate-income households, incomes that correlate with ethnic and racial minorities. For each described impediment, activities and outcome measures have been identified to help alleviate these barriers moving forward. The identified impediments to fair housing choice in the county are:

1. Displacement of Minorities Due to Gentrification
2. Income Inequality Between Race or Ethnicity
3. Decline in Household Purchasing Power
4. High Percentage of Renters are Cost Burdened
5. Increased Rate of Poverty
6. Funding Shortage for New and Existing Affordable Housing

Countywide racial and ethnic diversity is higher than the state rate. White, Black or African American, and Hispanic populations share a plurality of racial/ethnic makeup. However, there are still geographic areas within the county where racial or ethnic population divides are more

distinct. Tracts in the northern and western areas of the county are predominantly white, while the southwestern and southern parts of the county are mostly Hispanic. The central portions of the county near Lauderhill are majority Black.

Household income and location are very closely related in the Consortium. Tracts along the southwestern border near Weston and tracts in the northwestern corner near Coral Springs have a significantly higher Median Household Income (MHI) many other tracts throughout the county.

Poverty is concentrated in a few areas of the Consortium – high poverty areas are primarily found in the center of the county slightly inland. A significant number of tracts in the Consortium have very high poverty rates among Black or African American residents. Many tracts have a poverty rate of more than 50 percent and they can be found throughout the area. In Broward County, there were 44 tracts that have experienced minority displacement and one tract has experienced gentrification. Gentrification often involves displacement of low-income minority communities that are pushed out of the areas their families have lived in for decades.

The identified impediments touch on racial/ethnic issues as well as housing affordability. To address this, the county and jurisdictions have made efforts to increase affordability through preservation of tax exemption for affordable housing, repurposing vacant buildings to affordable housing, and improving incentives for developers.

The county and member cities of the HOME Consortium are recommended to focus on the following programmatic actions to further strengthen its efforts to address barriers and inequities in accessing affordable and desirable housing:

Action 1: Expand Dedicated Public Funding and Leverage Private Resources to Increase Affordable Housing Opportunities.

Action 2: Promote Municipal Enactment of County Land Use Code Affordable Housing Incentives.

Action 3: Expand Housing Counseling.

Action 4: Offer Local Incentives for Affordable Housing in Opportunity Zones.

Action 5: Expand Support for Homeless Service Providers and Homeless Housing Opportunities.

Action 6: Encourage Employer Assisted Housing.

Action 7: Expand Public Education Regarding Fair Housing Practices:

Action 8: Provide Tenant Information and Adopt Eviction Assistance Measures.

Action 9: Modify Construction and Rehabilitation Codes.

Action 10: Promote Municipal Enactment of County Land Use Code Affordable Housing Incentives.

Action 11: Increase the effectiveness of local fair housing ordinances through stronger code enforcement mechanisms.

## Methodology

This report was prepared by Broward County, in partnership with Civitas, LLC Civitas is a private affordable housing and public policy research firm. For more information, [civitassc.com](http://civitassc.com).

The analysis consists of a comprehensive review of laws, regulations, policies and practices affecting housing affordability, accessibility, availability and choice within the Broward County HOME Consortium. The assessment specifically includes an evaluation of:

- Existing socio-economic conditions and trends in the county, with a particular focus on those that affect housing and special needs populations.
- Public and private organizations that impact housing issues in the county and their practices, policies, regulations and insights relative to fair housing choice.
- The range of impediments to fair housing choice that exists within both the urban center communities and other areas of the cities and counties.
- Specific recommendations and activities for the jurisdictions to address any real or perceived impediments that exist; and
- Effective measurement tools and reporting mechanisms to assess progress in meeting fair housing goals and eliminating barriers to fair housing choice in the county.

The planning process was launched with a comprehensive review of existing studies for information and data relevant to housing need and related issues. These documents included local comprehensive plans and ordinances, the 5-Year Consolidated Plan for the Broward County HOME Consortium, the previous Analysis of Impediments to Fair Housing Choice, and other policy documents. Stakeholder input and observations were incorporated as well.

Additional quantitative data were obtained from many sources, including U.S. Census Bureau reports, American Community Survey data (ACS), the U.S. Bureau of Labor Statistics (BLS), Boxwood Means Inc. via PolicyMap and Federal Financial Institutions Examination Council (FFIEC), among others.

## Purpose of Fair Housing

Fair housing has long been an important issue in American urban policy – a problem borne in discrimination and fueled by growing civil unrest that reached a boiling point during the Civil Rights Movement of the 1960s. The passing of the Fair Housing Act in 1968 was a critical step in addressing this complex problem – but it was far from a solution. Since the passing of the Act, many community groups, private businesses, concerned citizens and government agencies have worked at battling housing discrimination in the face of persistent practices to the contrary.

By design, federal housing policy racially segregated housing for decades. Those policies, as well as the many local and state discrimination policies, are no longer legal, but many communities still feel the effect of red-lining and other policies meant to segregate racial groups. Unfortunately, while the laws have changed the impact of these historic practices and their link between a person’s race or ethnicity and access to housing and economic opportunities endures. Many areas of the country have been classified as a Racially/Ethnically Concentrated Area of Poverty (R/ECAP). Proactively addressing the connection between race, housing and poverty is a necessary part of any housing program.

The Fair Housing Act mandates that the Department of Housing and Urban Development (HUD) “affirmatively furthers fair housing” through its programs. Toward this end, HUD requires funding recipients undertake fair housing planning (FHP) and steps that lead to less discriminatory housing practices and better living conditions for minority groups and vulnerable populations.

As part of the HUD-mandated Consolidated Planning process, Broward County adopted its Five-Year Consolidated Plan in 2020. The Five-Year Consolidated Plan is an assessment of the economic and social state of the county, as well as local government policies and programs aimed at improving the living environment of its low- and moderate-income residents. The Strategic Plan includes a vision for the county that encompasses the national objectives of the Community Development Block Grant (CDBG) program and is accompanied by a first-year Action Plan that outlines short-term activities to address identified community needs. As part of the planning process, the Broward County HOME Consortium must also affirmatively further Fair Housing and undertake Fair Housing planning. This process includes the preparation of an Analysis of Impediments to Fair Housing Choice.

This 2020 Analysis of Impediments to Fair Housing Choice is an in-depth examination of potential barriers, challenges and opportunities for housing choice for the Broward County HOME Consortium residents on a countywide scale. Impediments to Fair Housing are defined as any actions, omissions or decisions based upon race, color, religion, national origin, disability, gender, or familial status that restrict, or have the effect of restricting, housing choice or the availability of housing choice. Fair Housing Choice is the ability of persons of similar income levels – regardless of race, color, religion, national origin, disability, gender, or familial status – to have the same housing choices.

The Analysis of Impediments is an integral component of the fair housing planning process and consists of a review of both public and private barriers to housing choice. It involves a comprehensive inventory and assessment of the conditions, practices, laws and policies that impact housing choice within a jurisdiction. It provides documentation of existing, perceived and potential fair housing concerns, and specific action strategies designed to mitigate or eliminate obstacles to housing choice for the residents. The Analysis is intended to serve as a strategic planning and policy development resource for local decision makers, staff, service providers, the private sector and community leaders in the county. As such, this Analysis of Impediments will ultimately serve as the foundation for fair housing planning in the county.

The long-term objective of this Analysis of Impediments to Fair Housing Choice is to make fair housing choice a reality for residents of the Broward County HOME Consortium through the prevention of discriminatory housing practices. One goal of the study is to analyze the fair housing situation in the county and assess the degree to which fair housing choice is available for area residents. A second goal is to suggest ways to improve the level of choice through continued elimination of discriminatory practices, if any are found to exist. The sections that follow provide a succinct overview of the legal and conceptual aspects of fair housing planning and policy.

## Fair Housing Concepts

Housing choice plays a critical role in influencing individuals' and families' abilities to realize and attain personal, educational, employment and income potential. The fundamental goal of HUD's fair housing policy is to make housing choice a reality through sound planning. Through its on-going focus on Fair Housing Planning, HUD "is committed to eliminating racial and ethnic discrimination, illegal physical and other barriers to persons with disabilities, and other discriminatory practices in housing." Among the recurring key concepts inherent in fair housing planning are:

- *Affirmatively Further Fair Housing (AFFH)* – Under its community development programs, HUD requires its grantees to affirmatively further fair housing through three broad activities: 1) conduct an *Analysis of Impediments to Fair Housing Choice*; 2) act to overcome identified impediments; and 3) track measurable progress in addressing impediments and the realization of fair housing choice.
- *Affordable Housing* – Decent, safe, quality housing that costs no more than 30 percent of a household's gross monthly income for utility and rent or mortgage payments.
- *Fair Housing Choice* – The ability of persons, regardless of race, color, religion, national origin, disability, gender or familial status, of similar income levels to have the same housing choices.
- *Fair Housing Planning (FHP)* – Fair Housing Planning consists of three components: the *Analysis of Impediments*, a detailed *Action Plan* to address identified impediments, and a monitoring process to assess progress in meeting community objectives. FHP consists of a close examination of factors that can potentially restrict or inhibit housing choice and serves as a catalyst for actions to mitigate identified problem areas.
- *Impediments to Fair Housing* – Any actions, omissions, or decisions based upon race, color, religion, national origin, disability, gender, or familial status that restrict, or have the effect of restricting, housing choice or the availability of housing choice.
- *Low and Moderate Income* – Defined as 80 percent of the median household income for the area, subject to adjustments for areas with unusually high or low incomes or

housing costs. *Very low income* is defined as 50 percent of the median household income for the area, subject to adjustments for areas with unusually high or low incomes or housing costs. Poverty level income is defined as 30 percent or below median household income.

- *Private Sector* – Private sector involvement in the housing market includes banking and lending institutions, insurance providers, real estate and property management agencies, property owners and developers.
- *Public Sector* – The public sector for the purpose of this analysis includes local and state governments, regional agencies, public housing authorities, public transportation, community development organizations, workforce training providers, and community and social services.

## Community Profile

The goal of the Community Profile is to provide evidence and analysis to be used by grant recipients seeking to address impediments to fair housing choice. This data is an important tool that will help guide decision makers in deciding where funds would have the greatest impact. The Community Profile is broken into three sections.

The first section is the Demographic Profile, which looks at the Consortium from the perspective of its people. Race and ethnicity, age, disability status, and other variables are explored. This section provides the necessary foundation to determining who lives in the jurisdiction and what their needs are. This outlines the demand for housing by looking at what households desire.

The second section, the Economic Profile, looks at the job market and the financial situation of the residents. evaluates how much households can afford. Factors like income, cost burden, and poverty are analyzed. These issues are compared to the factors in the demographic analysis to determine if disparities exist between racial and ethnic groups. This evaluates the demand for housing by looking at what a household can afford.

The third section is the Housing Profile and it looks at the County's housing stock. Multiple angles are explored, including home values, rents, occupancy, and age of housing to provide a snapshot of the physical environment of the region. This section establishes the supply of the available housing and how that matches up with the demand. Together, these pieces provide a data-driven view of the jurisdiction that will advance fair housing planning efforts and identify any impediments to fair housing choice.

Location of Broward County in Florida

## Demographic Profile

### Introduction

The Demographic Profile looks at the Consortium from the perspective of its people. Understanding who lives throughout the jurisdiction, where they live, and how that has changed provides a starting point for identifying impediments. This process requires exploring several demographic variables such as race and ethnicity, age, disability status, and others. This information will allow the Consortium to answer one of the most important questions when addressing fair housing issues, *who* needs assistance. People are at the foundation of the decision-making process and understanding what the demographics are and how they have changed is necessary before policy changes can be proposed.

### Population

Understanding how the population has changed over time is one of the most important demographic data points available. This change, and how different jurisdictions compare, gives a broad view of whether the area is a place experiencing growth. A growing population usually represents a place that is attractive to new households while a shrinking or stable population may mean resident's needs are not being met.

Population growth is generally a positive indicator but with it comes challenges, particularly for the housing market. When a population grows more quickly than the housing stock the overall demand increases which puts upward pressure on housing prices. Increased prices make it more difficult to locate affordable, safe, and secure housing, particularly for lower income households.

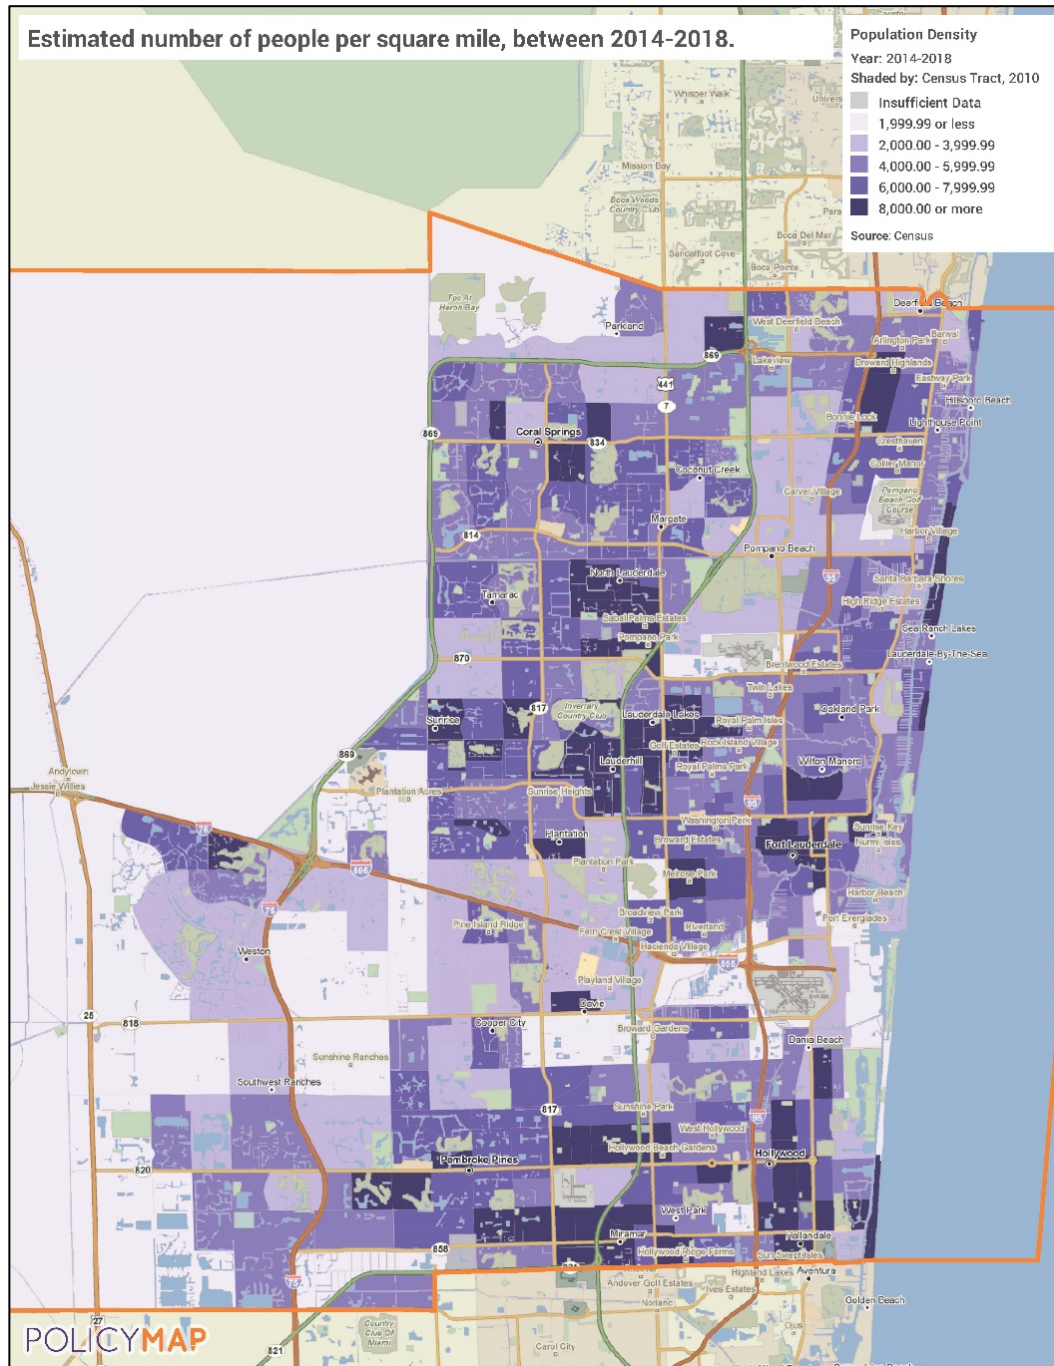

In Broward County, the population has grown by over 17% since 2000. Within the County, the growth rate differed considerably between jurisdictions. The City of Miramar had the highest overall growth rate at nearly 90%. At the other end of the spectrum is the City of Margate which grew by only 6.5%.

Table: Population – 2000 to 2018

	2000	2010	2018	2000 - 2010		2000 - 2018	
				% Change	Difference	% Change	Difference
<b>Broward County</b>	<b>1,623,018</b>	<b>1,734,139</b>	<b>1,909,151</b>	<b>6.8%</b>	<b>111,121</b>	<b>17.63%</b>	<b>286,133</b>
Coconut Creek	43,566	51,540	59,997	18.3%	7,974	37.72%	16,431
Coral Springs	117,549	121,116	131,151	3.0%	3,567	11.57%	13,602
Davie	75,720	90,648	103,132	19.7%	14,928	36.20%	27,412
Deerfield Beach	64,583	75,276	79,854	16.6%	10,693	23.65%	15,271
Lauderhill	57,585	67,127	71,328	16.6%	9,542	23.87%	13,743
Margate	53,909	53,600	57,427	-0.6%	-309	6.53%	3,518
Miramar	72,739	113,707	138,168	56.3%	40,968	89.95%	65,429
Pembroke Pines	137,427	152,366	168,260	10.9%	14,939	22.44%	30,833
Plantation	82,934	85,096	92,775	2.6%	2,162	11.87%	9,841
Sunrise	85,779	85,074	93,199	-0.8%	-705	8.65%	7,420
Tamarac	55,588	59,796	64,748	7.6%	4,208	16.48%	9,160
Florida	15,982,378	18,511,620	20,598,139	15.8%	2,529,242	28.88%	4,615,761
Source: 2000 Census (DP1, SF1), 2010 Census (DP1), 2014-2018 ACS 5-Yr Estimates (DP05)							

An important aspect of the jurisdiction’s population is where within the City residents live. Throughout the Consortium there are areas with relatively high concentrations of residents bordering tracts with a relatively low concentration of residents. The cities of Lauderdale and Margate have the disproportionately high population densities with 8,364 per square mile and 6,486 per square mile, respectively. Urban density can sometimes be associated with rundown buildings or overcrowding. However, density can be regarded as more environmentally, socially, and economically sustainable. Greater density puts more people in practical reach of the public services, medical care, and businesses.

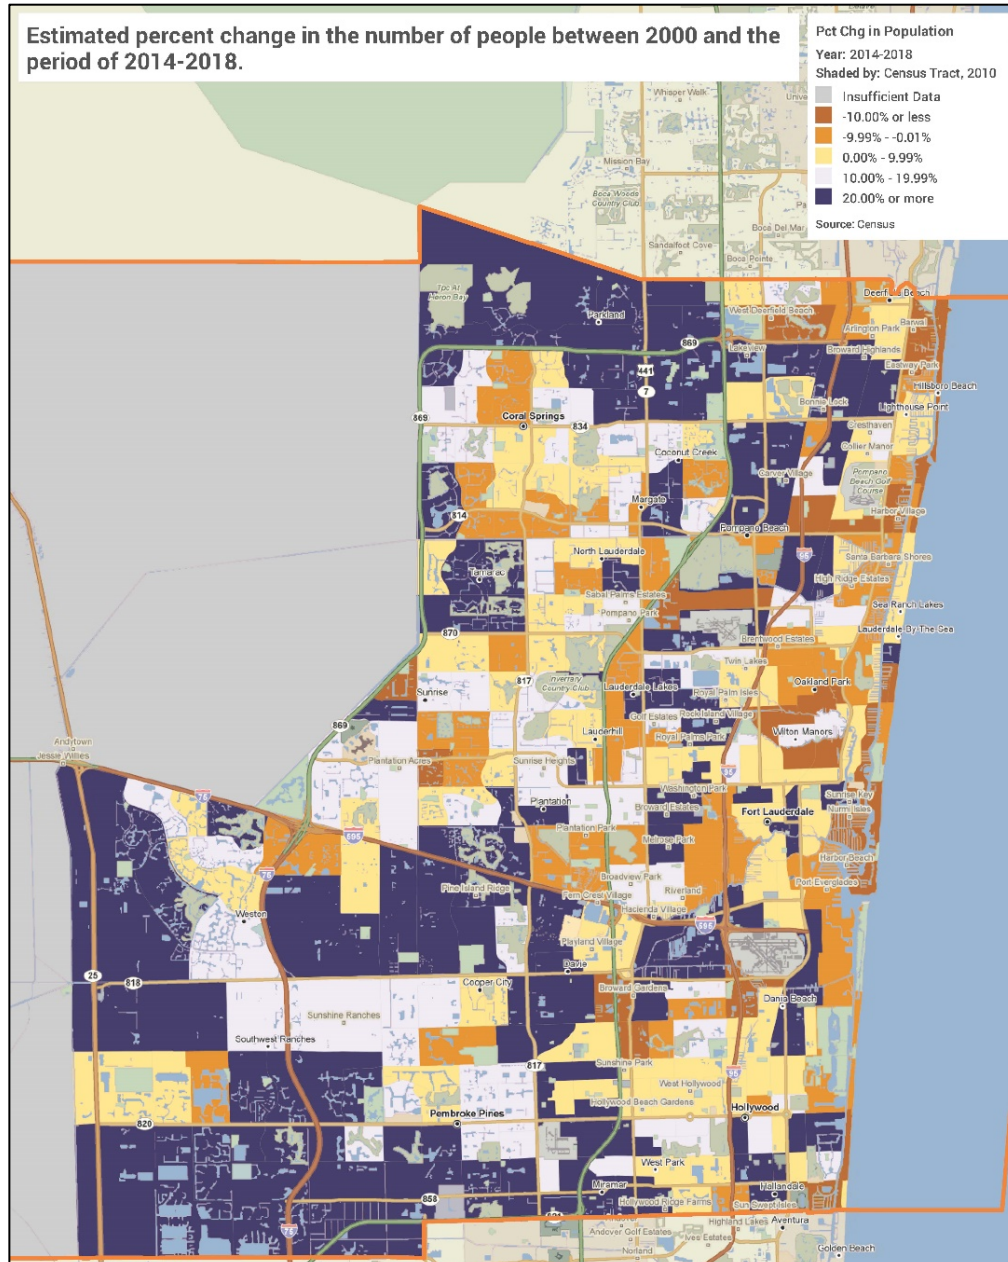

Map: Population Density

Source: 2014-2018 ACS via PolicyMap

The change in population by census tract can be a valuable data point to determine what areas of the Consortium people are leaving or moving to. In the last two decades, the population has changed inconsistently. Many tracts experienced significant growth with the population increasing by 20% or more. However, there are also a large number of tracts that shrank by over 10%. There is not an apparent pattern associated with the population changes except that population losses seem to be more common near the coast and growth occurs in the larger inland tracts. Coconut Creek had the largest citywide growth in population out of the included jurisdictions with 38.47% since 2000.

Map: Population Change since 2000

Source: 2014-2018 ACS via PolicyMap

## Age Groups

The age distribution is vitally important to the housing market and a jurisdiction's economy. The needs of residents can vary significantly depending on what v they are in. Residents who are nearing retirement or currently retired are often looking to downsize into smaller homes and may prioritize accessibility and transportation options. Young adults, particularly new families, have different housing demands and tend to look for homes they can grow into and possibly raise children in. Understanding how the age of the population is changing is important to determine which types of housing units are in need and it will also help set realistic goals for what funds will be available.

The median age in Broward county is currently 40.1 years, which is a slight increase from 2010. Florida has a median age of 42.2 years, making the County slightly younger than the state. Nearly 30% of the county's population is under the age of 25 and 15.9% are over the age of 65. The three fastest growing age groups in the county are 55 to 59 years, 60 to 64 years and 65 to 74 years. Between those two groups the population grew by over 105,000. Two age groups saw a decrease in total population, the 35 to 44 years and 15 to 19 years, resulting in a loss of over 9,500 people.

*Table: Age – 2010 to 2018*

Broward County	2010		2018	
	Number	Percent	Number	Percent
Under 5 years	105,011	6.1%	111,571	5.8%
5 to 9 years	102,943	5.9%	109,519	5.7%
10 to 14 years	114,371	6.6%	116,309	6.1%
15 to 19 years	114,795	6.6%	112,757	5.9%
20 to 24 years	102,256	5.9%	114,287	6.0%
25 to 34 years	222,914	12.9%	257,952	13.5%
35 to 44 years	262,884	15.2%	255,231	13.4%
45 to 54 years	269,600	15.5%	278,165	14.6%
55 to 59 years	105,855	6.1%	133,090	7.0%
60 to 64 years	89,062	5.1%	116,289	6.1%
65 to 74 years	117,860	6.8%	168,797	8.8%
75 to 84 years	84,385	4.9%	90,807	4.8%
85 years and over	42,203	2.4%	44,377	2.3%
Median Age	39.2	x	40.1	x

## Elderly

As noted earlier, the elderly population is relatively large in Broward County and growing. People aged 65 and over have particularly important housing needs. As people age, they tend to require new types of social services, healthcare, and housing. As communities across the nation grow proportionately older, the needs of the elderly become an increasingly important aspect of both public and private decision-making. Central to these evolving needs is access to housing options that are decent, safe, affordable, accessible, and located in proximity to services and transportation. Housing is one of the most essential needs of the elderly because the affordability, location, and accessibility of where they live will directly impact their ability to access health and social services – both in terms of financial cost and physical practicality.

In 2018, residents 65 years old and older made up 15.9% of the population. The living patterns of this population show a significant concentration of residents along the coastal areas of the County. Nearly every coastal census tract has over 20% of the population that is elderly and there are three cities with a citywide rate over 20%, Deerfield Beach (21.55%), Margate (22.3%), and Tamarac 25.6%

Map: Elderly Population

Source: 2014-2018 ACS 5-Yr Estimates via PolicyMap

### Age Dependency Ratio

Age dependency ratios relate the number of working-aged persons to the number of dependent-aged persons (children and the elderly). An area's dependency ratio is comprised of two smaller ratios – the child dependency ratio and the old-age dependency ratio. These indicators provide

insight into the social and economic impacts of shifts in the age structure of a population. Higher ratios of children and the elderly require higher levels of services to meet the specific needs of those populations. Furthermore, a higher degree of burden is placed on an economy when those who mainly consume goods and services become disproportionate to those who produce. It is important to note that these measures are not entirely precise – not everyone under the age of 18 or over 65 is economically dependent, and not all working age individuals are economically productive. With these caveats in mind, dependency ratios are still helpful indicators in gauging the directional impacts of shifting age structures.

Broward County as a whole has a lower age dependency ratio than the state due to the difference in elderly residents. Throughout the Consortium, the dependency ratio varies by jurisdiction. Tamarac has the highest dependency ratio by far with 74.3 due to the very large old-age ratio. The lowest dependency ratio is found in Davie with 50.3. There appears to be significant differences in what type of dependency is common in a location. Coconut Creek, Coral Springs, Davie, Lauderhill, Miramar, Pembroke Pines, Plantation, and Sunrise all have child dependency ratios larger than old age, sometimes by a considerable amount.

*Table: Age Dependency Ratios*

<b>Dependency Ratio</b>	<b>Florida</b>	<b>Broward County</b>	<b>Coconut Creek</b>	<b>Coral Springs</b>	<b>Davie</b>	<b>Deerfield Beach</b>	<b>Lauderhill</b>
Total	66.3	59.6	65.8	58.1	50.3	66.8	65.7
Old age	32.8	25.4	29.8	17.2	17.9	36.0	22.8

<b>Dependency Ratio</b>	<b>Margate</b>	<b>Miramar</b>	<b>Pembroke Pines</b>	<b>Plantation</b>	<b>Sunrise</b>	<b>Tamarac</b>
Total	64.3	51.6	60.1	57.8	61.4	74.3
Old age	36.6	15.3	27.1	25.0	26.6	44.6
Child	27.6	36.3	33.0	32.8	34.9	29.7
Source: 2014-2018 ACS 5-Yr Estimates (S0101)						

### Race and Ethnicity

Federal housing policy intentionally racially segregated housing for decades. Those policies, as well as the many local and state discrimination policies, are no longer legal, but many communities still feel the effect of red-lining and other laws meant to segregate racial groups. An unfortunate truth is that within the United States there is a link between a person’s race or ethnicity and their access to housing and economic opportunities. Many areas of the country have been classified as a Racially/Ethnically Concentrated Area of Poverty (R/ECAP). Proactively addressing the connection between race, housing, and poverty is a necessary part of any housing program.

The major demographic difference between the County and the State is the size of the Black or African American, non-Hispanic population. In Florida, approximately 15% of the population is Black or African American and in Broward County it is over 27%. At the state level, White, non-Hispanic residents make up a slight majority of the population while at the County level they make up a slight plurality with 35.3%.

Chart: Race and Ethnicity

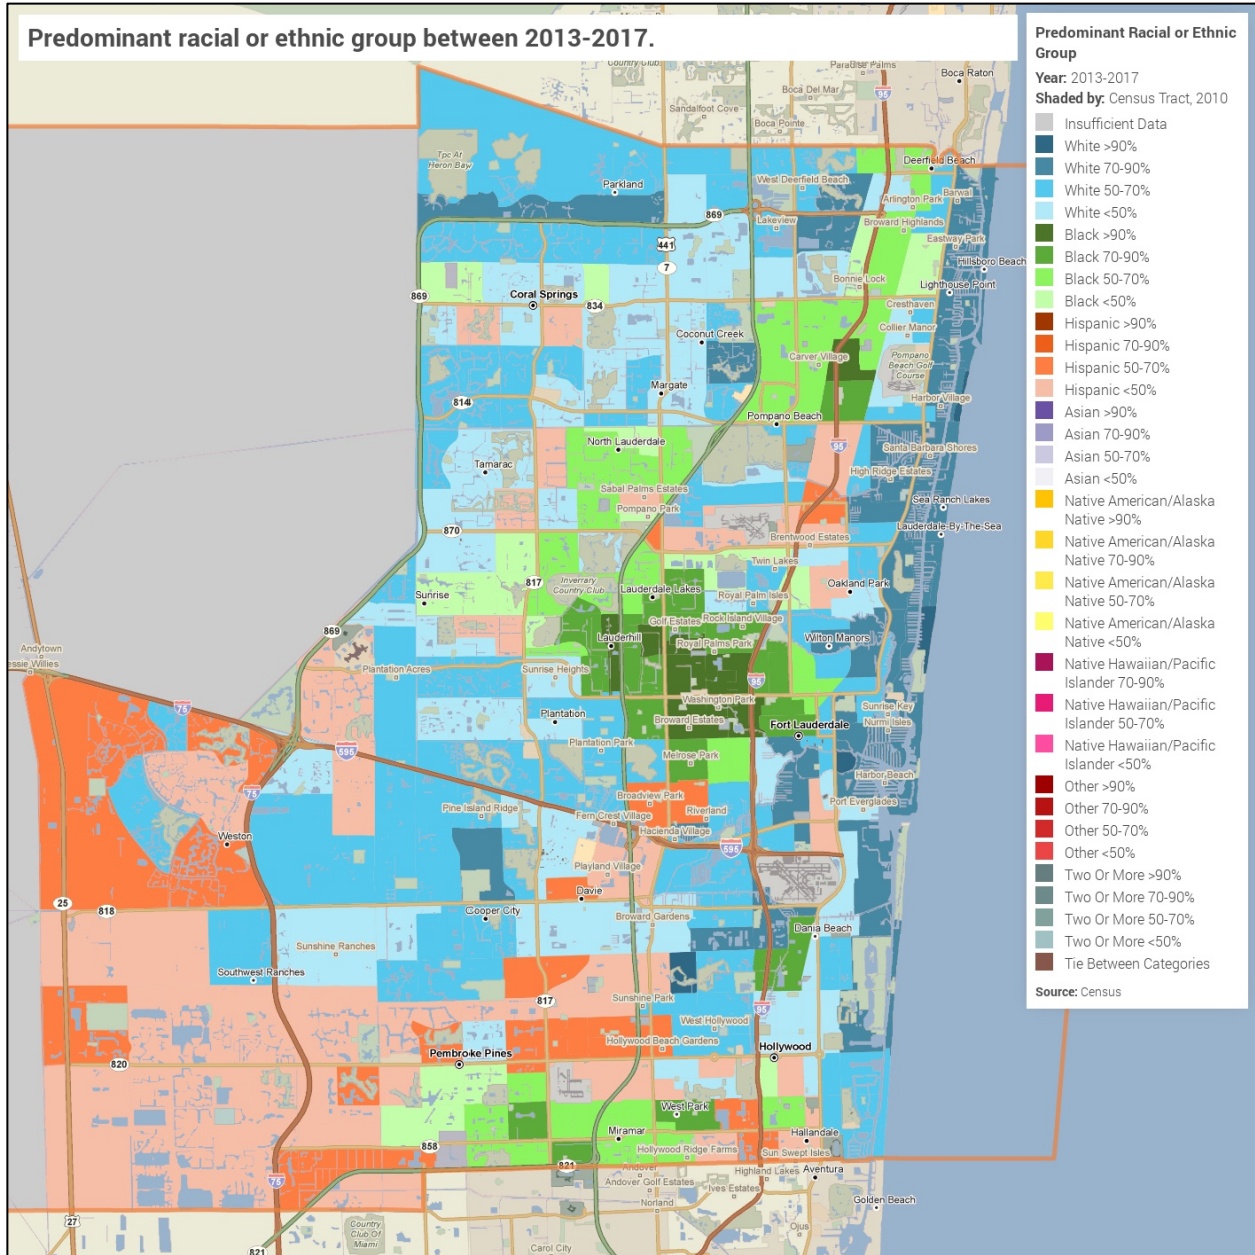

Source: 2014-2018 American Community Survey 5-Year Estimates (B03002)

## Diversity

As noted above, Broward County is a diverse area and no racial or ethnic group is in the majority. The County does include areas where different racial groups make up a large portion of the population, occasionally over 90%. Coastal tracts with a relatively large elderly populations have a predominantly White population. The southern part of the county and some tracts throughout are predominantly Hispanic while the area west of Fort Lauderdale has a very large Black population.

Map: Predominant Race or Ethnicity

## Displacement and Gentrification

Gentrification can have a major impact on the economic and social landscape of a county. Often, gentrification involves displacement of low-income minority communities that are pushed out of the areas their families have lived in, sometimes for generations. The economic growth and investment that comes from gentrification can be a boon, but it is important to mitigate the potential negative aspects that so often come with it.

One way to measure displacement and gentrification is using a modified methodology developed by the National Community Reinvestment Coalition. The following map shows areas of Broward County that may be impacted by gentrification and displacement. Any census tract that was in 40th percentile or less of Median Home Value (HMV) and Median Household Income (MHI) in 2010 was eligible for analysis. An eligible tract was then considered Gentrified if it was in the 60th percentile or more for MHV and College Education in 2017. A gentrified tract was considered to have displaced racial minorities if there was a 5% or more decline in the non-white population.

In Broward County, there were 177 census tracts that were eligible for gentrification and displacement. Of those tracts, 44 of them were found to have experienced minority displacement and one tract experienced gentrification.

Map: Gentrification and Displacement by Census Tract

## Disability

Residents who have a disability face additional challenges, particularly when it comes to housing. Finding affordable housing is even more difficult for those who need units that have or can be modified for wheelchairs, shower supports, ramps, and other accessibility aides. Communities with a relatively large elderly population need to pay attention to this issue due to the close relationship between age and disability.

In addition to having to overcome barriers such as housing discrimination and difficulty in finding accessible units, people with disabilities face financial hardships at much higher rates than the average person. The median earnings for someone with a disability in the county is approximately \$10,000 less than those without a disability. Residents with a disability also have higher poverty rates and are less likely to be employed or in the labor force.

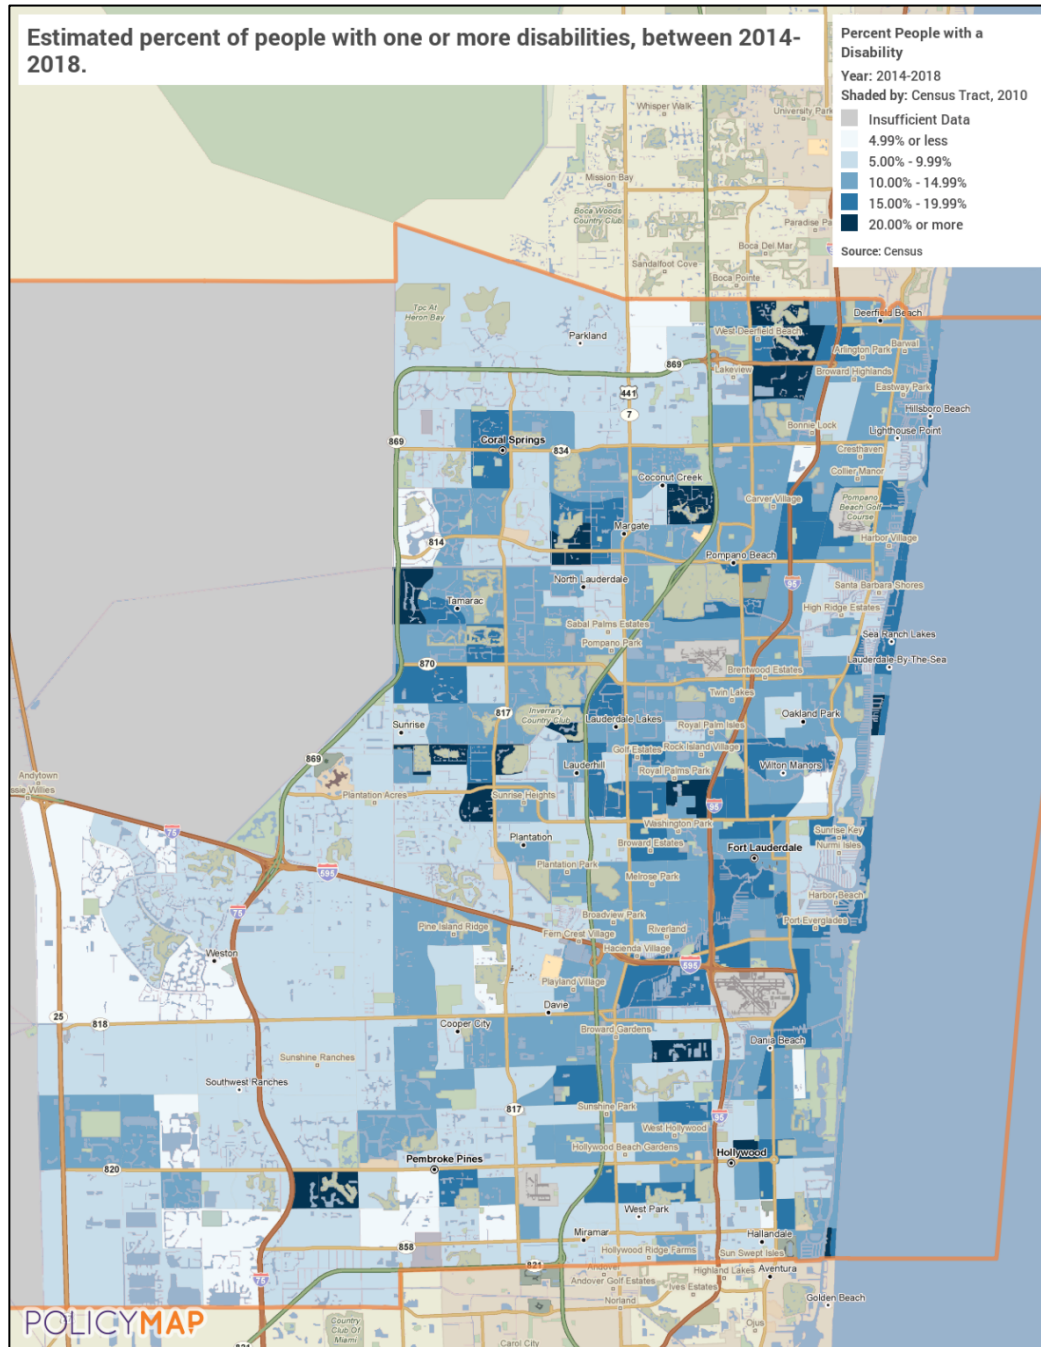

*Table: Disability Characteristics*

	Florida		Broward County	
	With a Disability	Without a Disability	With a Disability	Without a Disability
Population Age 16 and Over	2,566,376	14,060,034	195,466	1,341,197
Employed	19.1%	62.3%	21.5%	67.7%
Not in Labor Force	77.9%	33.8%	74.8%	27.8%
Median Earnings	\$22,241	\$30,840	\$22,429	\$32,105
Below the Poverty Level	19.0%	12.3%	19.3%	11.2%

Source: 2014-2018 ACS 5-Yr Estimates (S1811)

The map below shows the distribution of people with a disability in Broward County. Like many of the variables studied in this analysis, the concentration of people with a disability is disproportionate across the region. There are many tracts with a high disability rate (20% or over) and some with low rates, less than 5%. Surprisingly, the areas identified above as having a large elderly population do not appear to have noticeably high disability rates. However, the highest citywide disability rate is in Tamarac (15.3%), which also reported the highest senior population.

Map: Disability

Source: 2014-2018 ACS 5-Yr Estimates via PolicyMap

## Veterans

Since the War on Terror started over 18 years ago the number of veterans in the United States has consistently increased. With this influx of veterans there has been a mix of unique challenges and opportunities. Many communities, in cooperation with the Veterans Administration, have worked to provide educational and economic opportunities to veterans and to reduce veteran homelessness to zero. Veterans do face additional challenges though, particularly due to physical and mental disabilities obtained while serving.

As of 2018 there were over 76,000 veterans living in Broward County making up 5.1% of the population. Veterans have a higher median income labor force participation and unemployment rate. They have a higher disability and lower poverty rates than non-veterans.

*Table: Comparison of Veterans and Non-Veterans*

	<b>Veterans</b>	<b>Non-Veterans</b>
Population Over 18 Years Old	76,823	1,422,490
Median Income	\$39,102	\$28,603
Labor Force Participation Rate	81.7%	79.3%
Unemployment Rate	6.0%	6.5%
Below Poverty in the Past 12 Months	5,397 (7.1%)	174,214 (12.3%)
With Any Disability	21,513	171,874
Source: 2014-2018 ACS 5-Yr Estimates (S2101)		

## Sexual Orientation and Gender Identity

HUD regulations prohibit discrimination based on sexual orientation and gender identity, but local protection is beneficial to the residents of the County. Accurate data on the number of LGBT residents in a community is difficult to gather due to stigma and methodological barriers. Lack of adequate legal protections can lead to underreporting and difficulty adequately defining orientations can lead to variation among estimates.

According to a 2017 Gallup Poll, approximately 4.2% of the state's population identifies as LGBT. The US Census Bureau 1.33% of the families in the County are same-sex couples, approximately 50% higher than the statewide rate. The following map shows the concentration of same-sex households in the county. The area around the city of Milton Manors has a disproportionately high same-sex couple population. There are three tracts where approximately 12% of the families are same-sex couples.

Map: Percent Same-Sex Couples

Source: 2010 Census Estimates via PolicyMap

Protections based on sexual orientation and gender identities are strong in Broward County. According to the Movement Advancement Project, an independent research firm focusing on equality and opportunities for all, in Broward County employment, housing, and public accommodations are protected regardless of sexual orientation and gender identity. The County also has an ordinance in place prohibiting conversion therapy for minors.

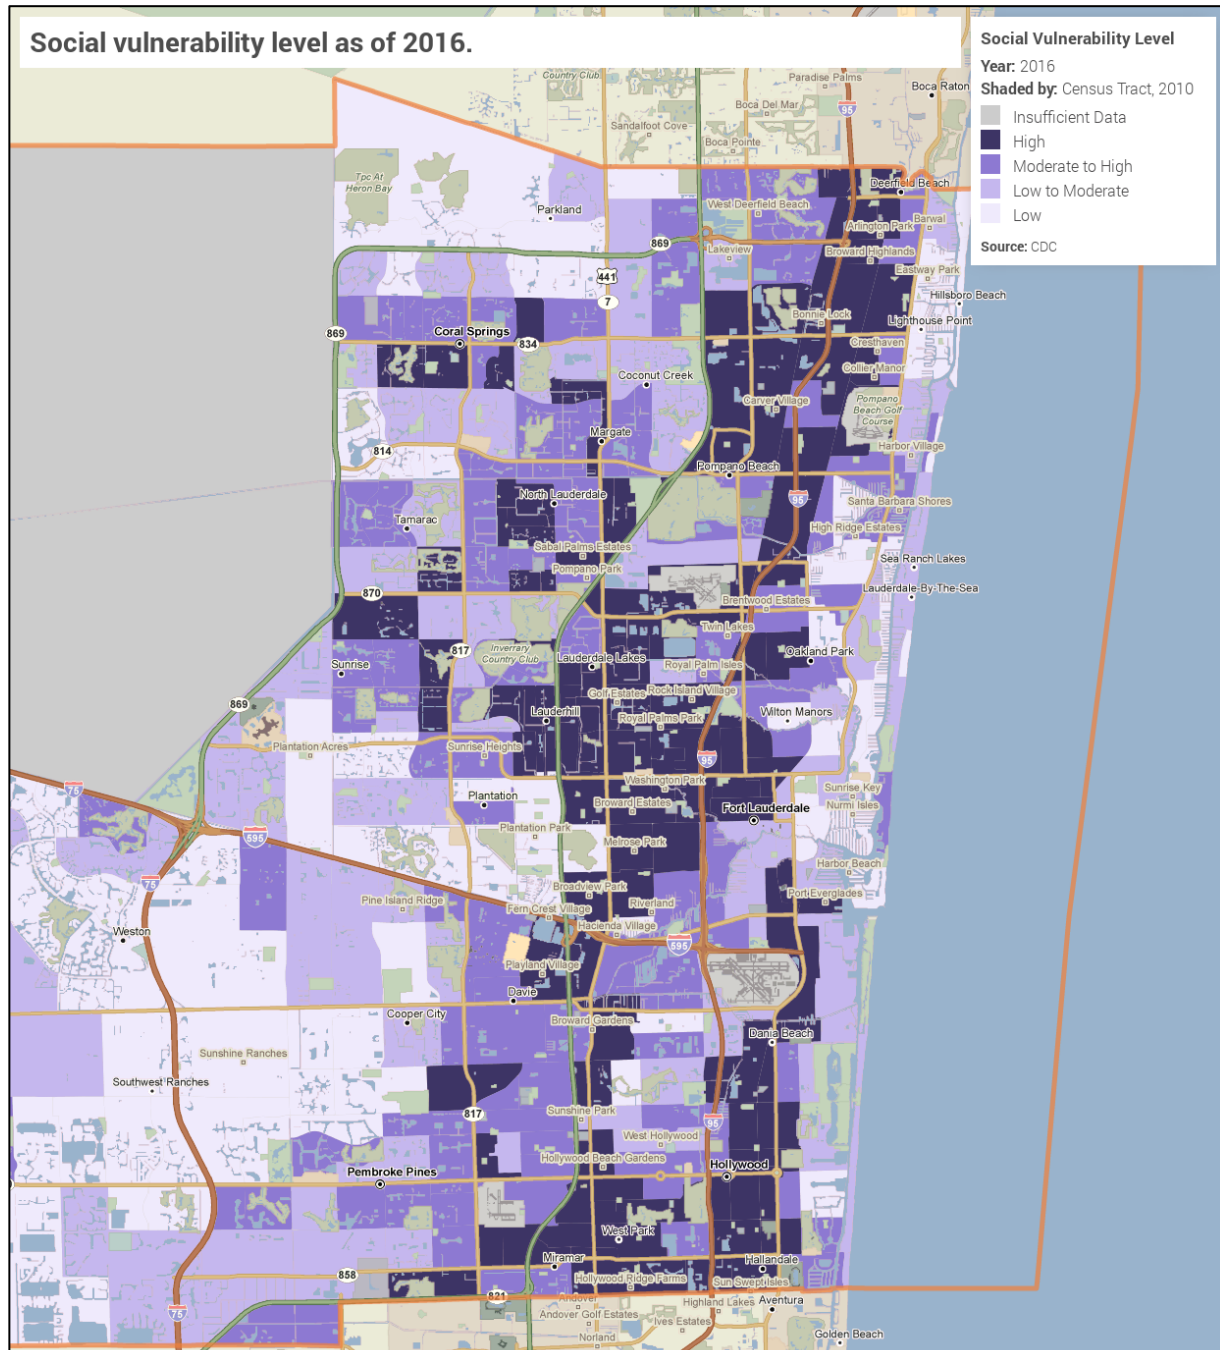

Though Broward County has strong protections in place, additional measures can be taken to help reduce impediments to fair housing for LGBT residents. City level protections are valuable, as are county level policies that are more inclusive than statewide policies. At the state level there are no adoption or foster care protections for LGBT parents or family leave laws. There are also no nondiscrimination laws in place when it comes to credit and lending. Discrimination in lending can act as a barrier to fair housing choice within the County.

### Social Vulnerability

Within every community there are populations that are particularly vulnerable to disruption, health problems, natural disasters, climate change, and extreme weather. Broward County's location means that the population must take particular care to address socially vulnerable residents. Hurricanes and the effects of climate change are more strongly felt in southern Florida than many other locations.

The Center for Disease Control developed the "social vulnerability index" to help flag areas that may need greater support and assistance in the case of disaster. It is comprised of four categories of vulnerability – socioeconomic status, household composition and disability, minority status and language, and housing and transportation. In Broward County, tracts slightly inland from the coast are more likely to have a moderate to high or high vulnerability level than coastal or western tracts. In particular, tracts that have a large Black population have higher vulnerability than other areas.

Map: Social Vulnerability

Source: 2012-2016 ACS 5-Yr Estimates via PolicyMap

## Economic Profile

The market for housing and the availability of affordable housing is tied to two forces: supply and demand. In theory, the market will reach an equilibrium where supply equals demand but in practice it is much more complicated. Demand is not a static data point, it is the culmination of the needs, wants, and resources available to members of the population. An important factor in the demand is the economic position a person is in. Their income, employment opportunities, education, and availability of transportation all play a part in the demand for affordable housing.

### Income

Since 2010, the purchasing power in the County has decreased by 3% for a family earning the median household income. This is a slightly larger decrease than the statewide change of -2.3%. There are only two jurisdictions in the Consortium that saw the purchasing power of their residents increase, Coconut Creek and Tamarac. The largest drop in purchasing power was in the City of Margate.

*Table: Purchasing Power (Median Household Income)*

	2010	2018	Change in Purchasing Power
Broward County	\$59,132.46	\$57,333	-3.0%
Coconut Creek	\$56,539.25	\$58,627	3.7%
Coral Springs	\$81,738.09	\$74,371	-9.0%
Davie	\$67,256.39	\$66,951	-0.5%
Deerfield Beach	\$46,597.67	\$45,581	-2.2%
Lauderhill	\$43,977.00	\$40,737	-7.4%
Margate	\$52,407.50	\$45,667	-12.9%
Miramar	\$74,270.75	\$70,005	-5.7%
Pembroke Pines	\$72,369.60	\$66,816	-7.7%
Plantation	\$75,994.60	\$71,721	-5.6%
Sunrise	\$56,618.18	\$55,043	-2.8%
Tamarac	\$46,824.16	\$49,423	5.6%
Florida	\$54,519.13	\$53,267	-2.3%
Source: 2006-2010 (adjusted for inflation), 2014-2018 ACS 5-Yr Estimates (DP03)			

The following map displays how the MHI in Broward County is tied closely to a person's place of residence. The MHI is not consistent throughout the County. In general, households on the western side of the county have a median household that is higher than residents closer to the ocean, particularly those that are slightly inland. These high MHI tracts report a median income of \$125,000 or more, which is more than double the MHI reported in nearby low MHI tracts.

Map: Median Household Income

Source: 2014-2018 ACS via PolicyMap

Income and Race

In Broward County, race or ethnicity is correlated with income. Two groups report an MHI greater than the countywide rate, White and Asian households. Black households have the lowest MHI, over \$10,000 less than the median and \$16,000 less than White households. When an area has a large minority population with a low MHI it is possible that area meets HUDs definition of a Racially/Ethnically Concentrated Area of Poverty (R/ECAP). These areas are a top priority to address within the Analysis of Impediments and may need to be a focus for grant fund use.

Graph: Income and Race

Data Source: 2014-2018 American Community Survey 5-Yr Estimates (S1903)

Note: Groups with a small sample size and large margin of error were removed from this visualization.

**Cost Burden**

According to HUD, households paying in excess of 30 percent of their monthly household income towards housing costs (renter or owner) are said to be “cost burdened”. When a household is cost burdened, they are at an increased risk of homelessness and a substandard living environment. To analyze the impact of cost burden on residents the population is separated into three housing types: homeowners with a mortgage, homeowners without a mortgage, and renters.

Renters are, by far, the most cost burdened group in the County. Over 61% of renters are cost burdened and 51% of renters pay 35% or more of their income to housing costs. Even without considering housing cost burden, renters have greater housing instability and a greater likelihood of needing assistance. A household that can purchase property within their means is able to provide a more secure housing situation and create intergenerational wealth. Assisting renters who wish to own a home is a way to help alleviate financial pressure on renters.

Homeowners have a significantly lower cost burden rate but there are still households within the County who lack the income necessary for economic security. Approximately 23.5% of homeowners without a mortgage and approximately 41.2% of homeowners with a mortgage are cost burdened. These 144,295 owner occupied households may need assistance. Homeowners without a mortgage have a particularly low-cost burden rate. However, they also tend to be elderly and may lack disposable income, meaning any increase in housing costs can cause significant problems.

*Table: Monthly Housing Costs*

	Homeowners with a Mortgage		Homeowners without a Mortgage		Renters	
	Number	Percentage	Number	Percentage	Number	Percentage
Less than 20%	84,666	32.4%	96,264	61.8%	37,419	15.2%
20.0 to 24.9%	38,889	14.9%	13,289	8.5%	29,669	12.1%
25 to 29.9%	30,011	11.5%	9,478	6.1%	27,912	11.4%
30 to 34.9%	22,486	8.6%	6,985	4.5%	24,639	10.1%
35% or more	85,178	32.6%	29,646	19.0%	125,378	51.2%
<b>Total Cost Burdened</b>	<b>107,664</b>	<b>41.2%</b>	<b>36,631</b>	<b>23.5%</b>	<b>150,017</b>	<b>61.3%</b>

Source: 2014-2018 ACS 5-Yr Estimates (DP04)

Within Broward County there are several tracts with a disproportionately high cost burdened homeowner rate. In these areas over 45% of homeowners are cost burdened. The City of Lauderdale has the highest citywide rate of cost burdened owner-occupied households with 39.5%. There are also a few tracts with a low owner cost burden, less than 15%. There is no clear geographic pattern to these relatively high and low rate tracts.

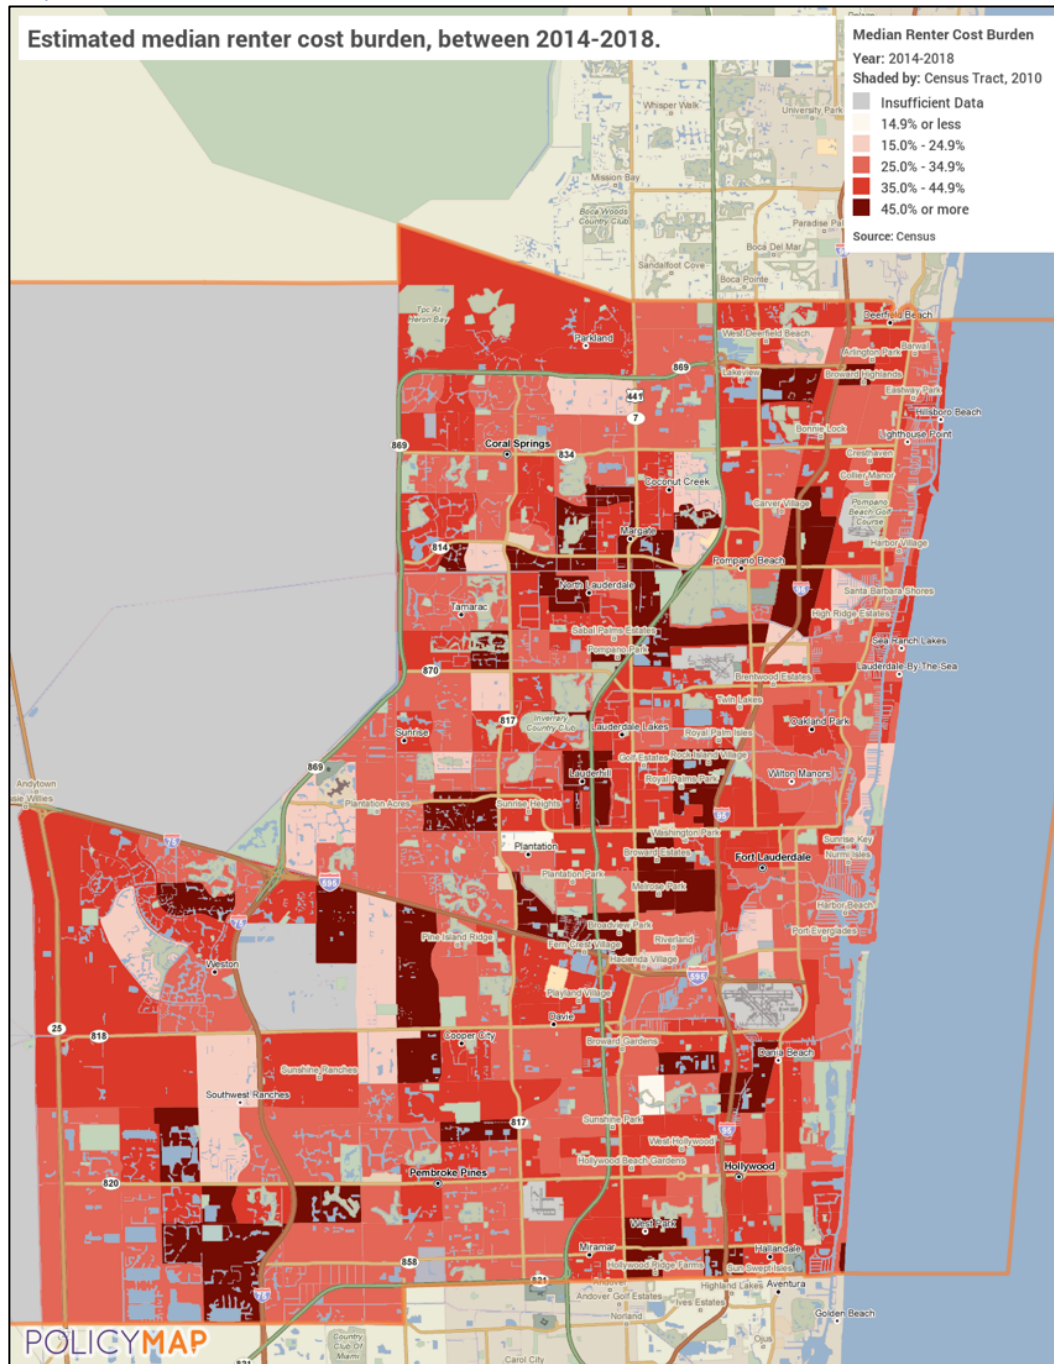

*Map: Cost Burdened Owner-Occupied Households*

Source: 2014-2018 ACS via PolicyMap

Cost burdened renters exhibit a pattern similar to homeowners, except tracts with a high cost burden rate are more common. The high and low-cost burden tracts are not concentrated in any particular area of the county and are found throughout it, often neighboring tracts with a significantly different rate. Similar to the homeowner cost burden rate, the highest citywide rate is found in Lauderdale with 67.3%.

Map: Cost Burdened Renter Households

Source: 2013-2017 ACS via PolicyMap

## Poverty

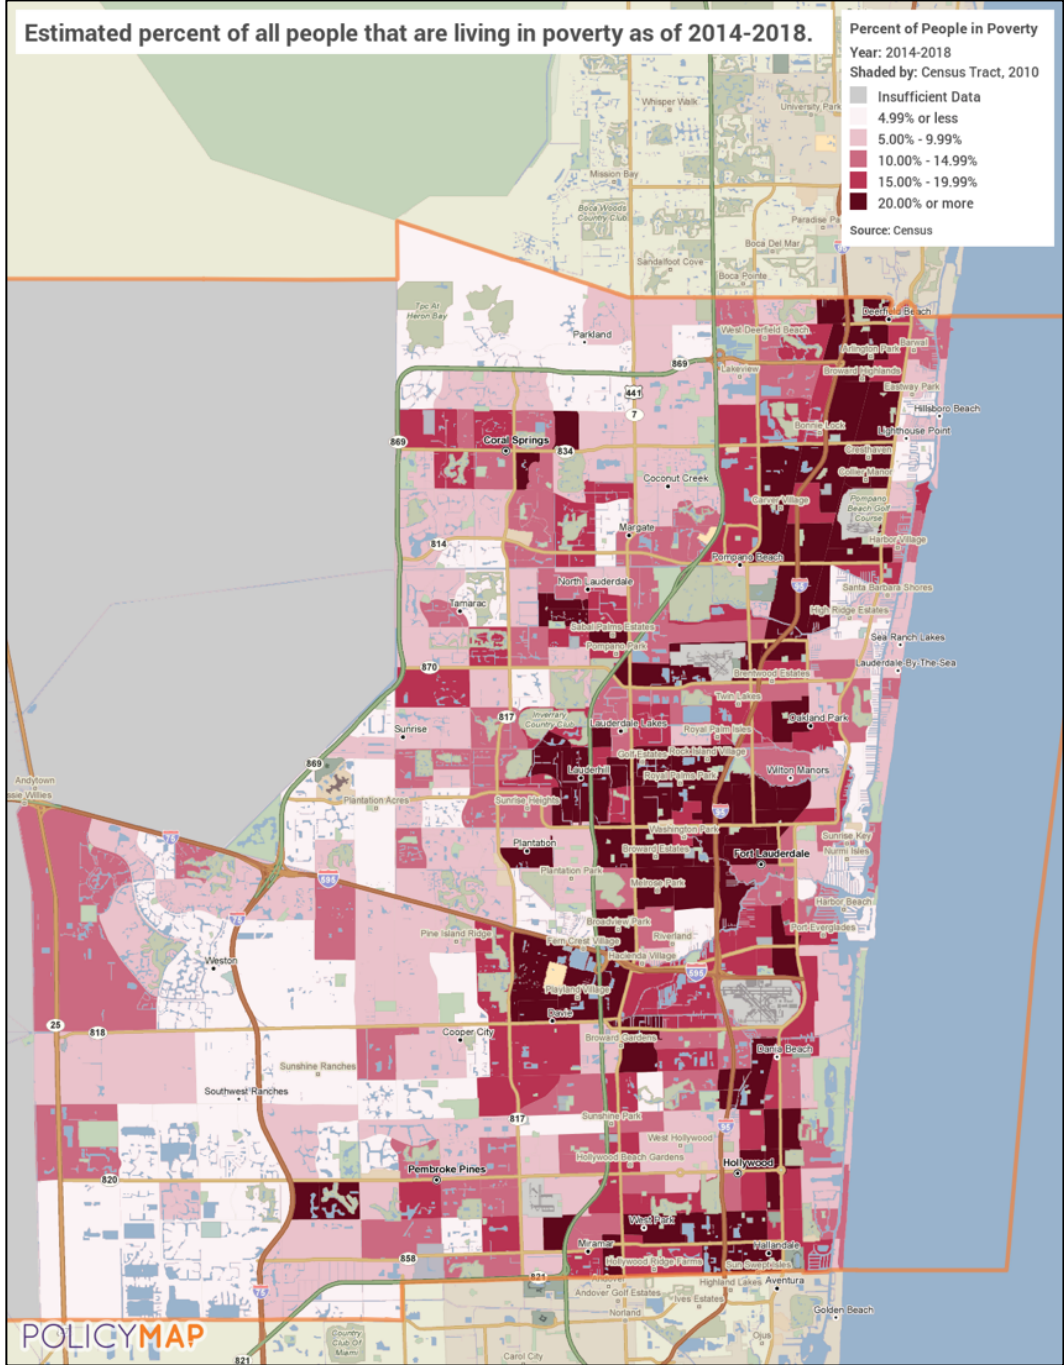

In Broward County, the poverty rate has increased from 12.3% to 13.5% between 2010 and 2018. This change is similar to the statewide rate where the poverty rate grew from 13.8% to 14.8%. The City of Pembroke Pines had the largest change in poverty rate, growing from 6.4% to 9.4%, or nearly 50% growth. Three tracts reported a decrease in poverty, Coconut Creek, Margate, and Tamarac. As noted above, Coconut Creek and Tamarac were the only two cities that had an overall increase in purchasing power during this time period.

*Table: Poverty Rate*

	2010	2018	Difference	Change
Broward County	12.3%	13.5%	1.20%	9.8%
Coconut Creek	8.0%	7.9%	-0.10%	-1.3%
Coral Springs	7.6%	10.1%	2.50%	32.9%
Davie	10.8%	12.9%	2.10%	19.4%
Deerfield Beach	16.4%	17.0%	0.60%	3.7%
Lauderhill	22.1%	23.6%	1.50%	6.8%
Margate	11.0%	10.4%	-0.60%	-5.5%
Miramar	8.4%	10.2%	1.80%	21.4%
Pembroke Pines	6.4%	9.4%	3.00%	46.9%
Plantation	7.3%	9.6%	2.30%	31.5%
Sunrise	10.3%	12.0%	1.70%	16.5%
Tamarac	10.4%	10.0%	-0.40%	-3.8%
Florida	13.8%	14.8%	1.00%	7.2%
Source: 2006-2010, 2014-2018 ACS 5-Yr Estimates (DP03)				
Data note: All people.				

In Broward County poverty rates vary significantly throughout the County. High poverty areas are primarily found in the center of the county slightly inland. In these areas, 20% or more of the population lives in poverty. Low poverty tracts are more common along the coast and on the western side of the county where the rate is often less than 5%.

Map: Poverty Rate

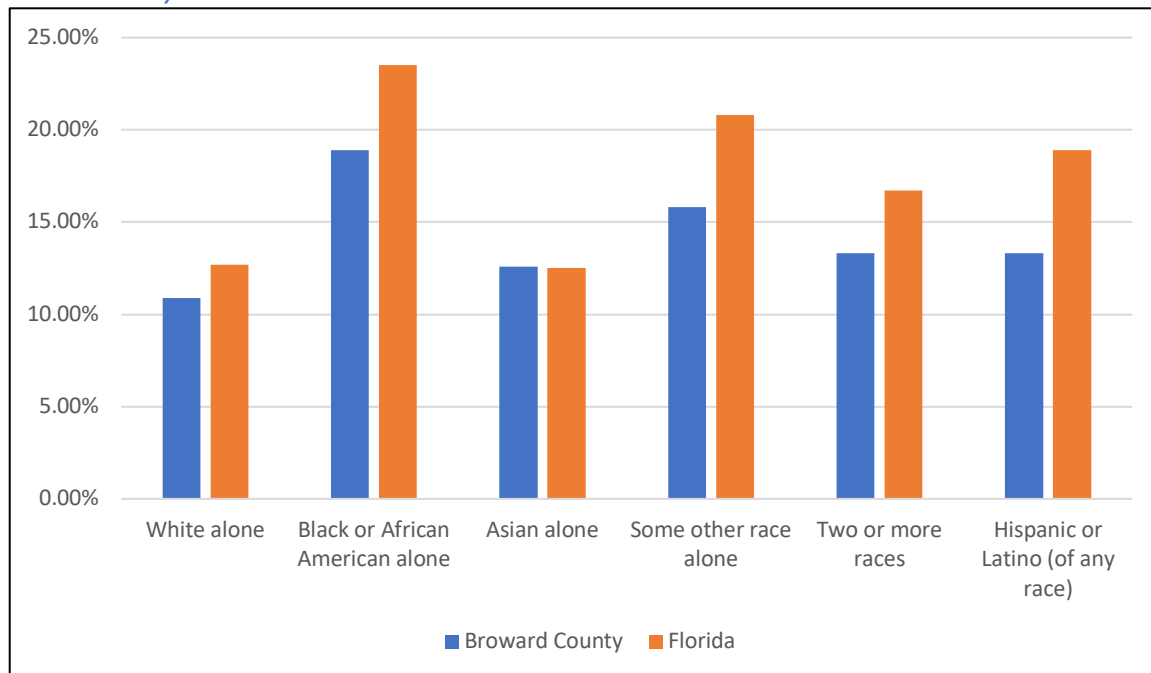

Source: 2014-2018 ACS via PolicyMap

## Poverty and Race

In both the County and the State, the race or ethnicity of a household is correlated with the likelihood they live below the poverty level. Black or African American residents have the highest poverty rate in the County, as well as the State. The statewide poverty rate is higher for every racial or ethnic group than the countywide rate, except for Asian households.

*Chart: Poverty and Race*

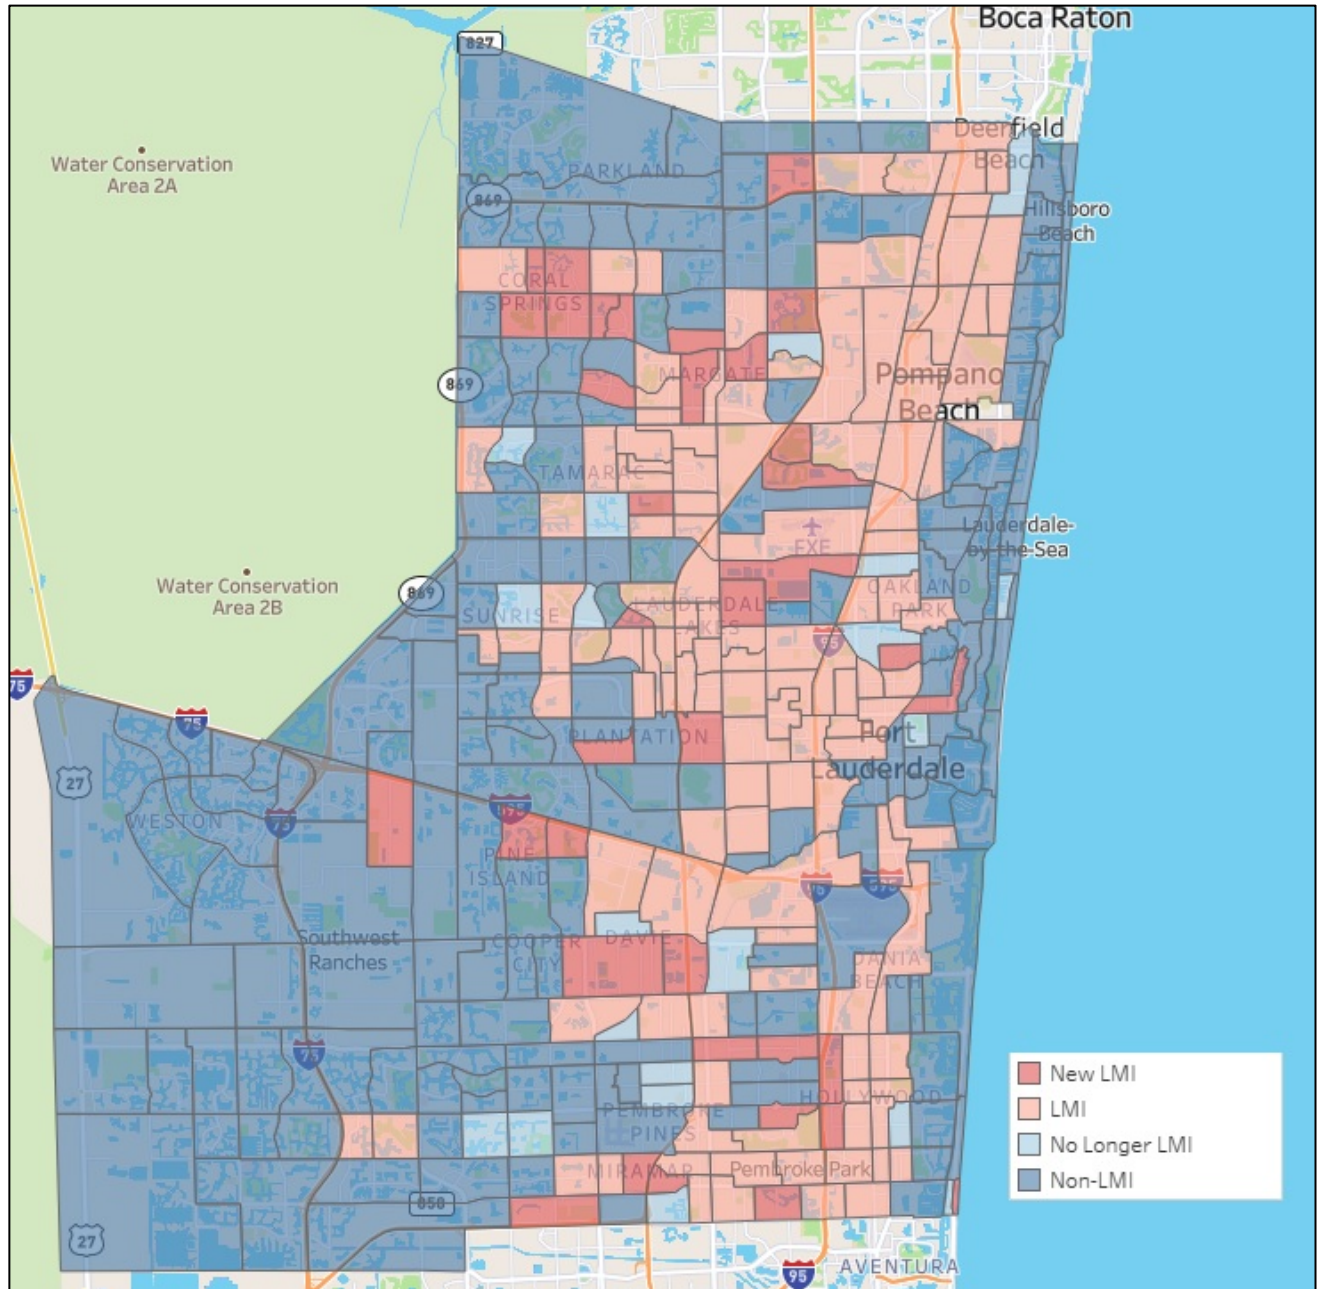

Source: 2014-2018 American Community Survey (DP03)

## LMI Census Tracts

Every five years HUD publishes an update to the LMI Status of tract block groups. LMI tracts are locations where at least 51% of the residents are LMI, which allows HUD grant programs to be classified as LMA benefit. In Broward County, the majority of Census Tracts are designated LMI. Residents in these areas need additional support to attain affordable housing. In Broward County 37 new LMI tracts were identified between the 2014-2018 LMISD calculations and 2019-2023. There were also 20 tracts that are no longer LMI.

Map: LMI Census Tracts

Source: HUD LMISD FY 2018 & FY 2019

### Employment

The unemployment rate in each jurisdiction tracks closely with the countywide rate. The only slight outlier is Lauderhill which began having a higher unemployment rate in 2015. Rates have been consistently lower in Miramar and Davie than other jurisdictions, but only by a fraction of a percent.

Chart: Unemployment Rate from 2010 to 2018 (%)

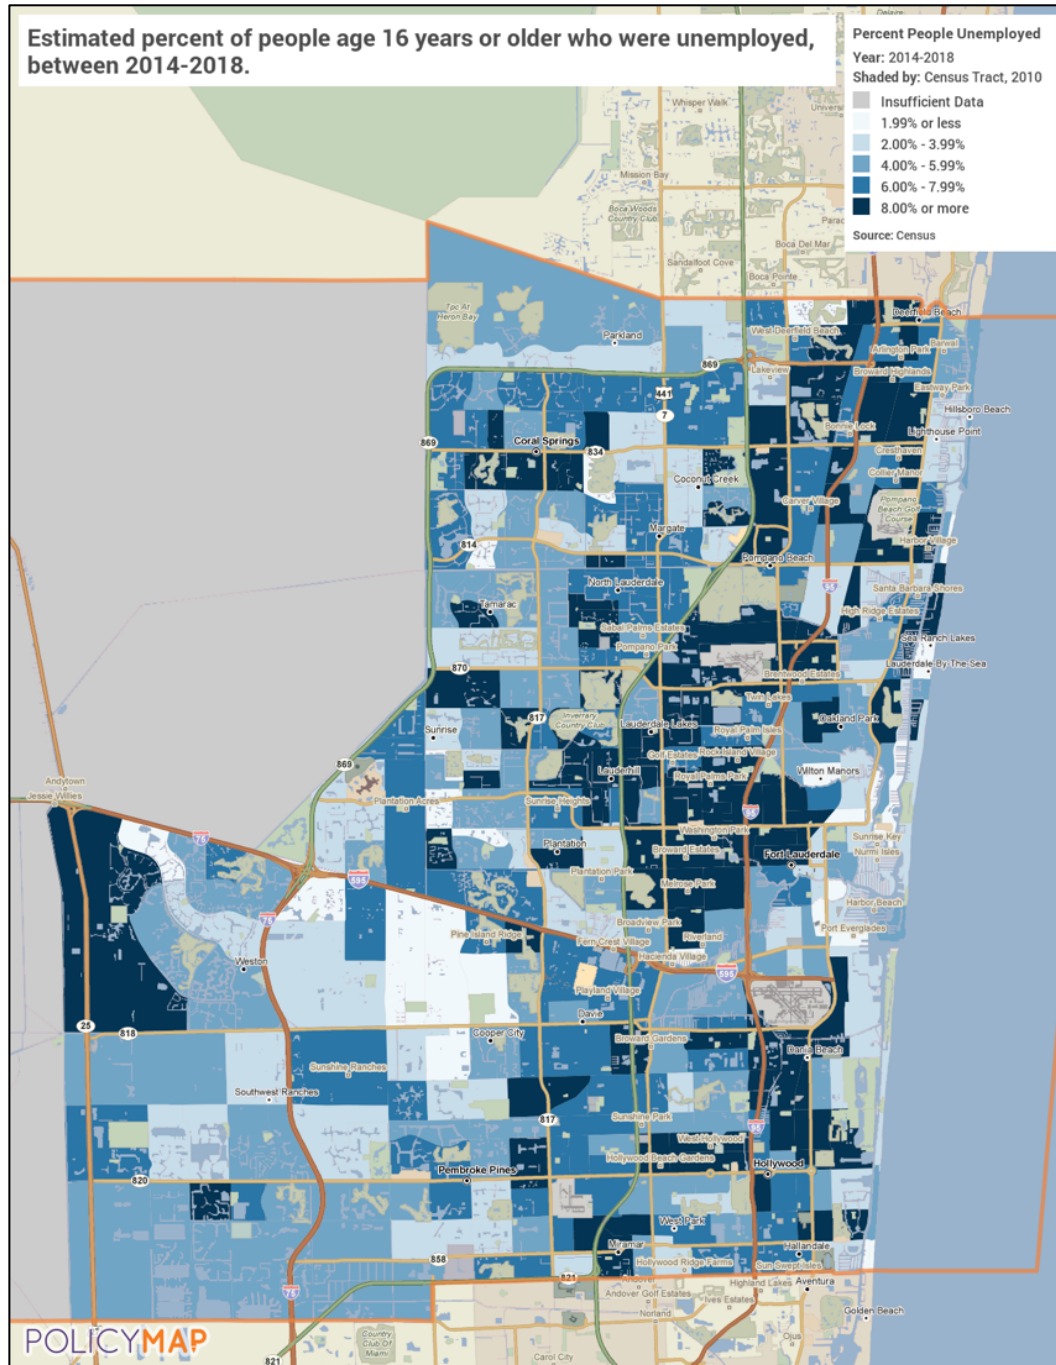

Source: BLS, Local Area Unemployment Statistics, Not seasonally adjusted

The following map displays the unemployment rate based on data from the American Community Survey. The methodology used by the US Census Bureau differs from the one used by the Bureau of Labor Statistics. The varying sources may provide different numbers; they each still show a valuable trend that can assist with decision-making. Unemployment rates from BLS are not available at the census tract level and thus can't be used to identify concentrations within the County. In Broward County, unemployment is higher in the tracts slightly inland from the coast. This is the same general area that reported higher poverty rates than along the coast or on the

west side of the tract. While some areas have relatively higher poverty rates, most report less than 8% overall.

Map: Unemployment Rate

Source: 2013-2017 ACS via PolicyMap

## Transportation

In Broward County, commuting via personal vehicle is the most common form of transportation, by far. Nearly 89% of the County's population uses personal vehicles, a rate similar to the statewide rate. The largest difference in commuting patterns between the state and county is that public transportation is slightly more common in the County and working from home is slightly more common statewide.

*Table: Commuting Method*

	Florida	Broward County
Total Workers (16 Years and Older)	9,140,393	931,338
Car, truck, or van	88.6%	88.9%
Drove alone	79.4%	79.9%
Carpooled	9.2%	8.9%
Public transportation (excluding taxicab)	1.9%	2.6%
Walked	1.4%	1.2%
Bicycle	0.6%	0.6%
Taxicab, motorcycle, or other means	1.6%	1.6%
Worked at home	5.8%	5.0%
Source: 2014-2018 ACS 5-Yr Estimates (S0801)		

In Broward County, the commute travel times grew between 2010 and 2018 by 1.6 minutes, on average. This change occurred primarily due to the drop in the percentage of residents commuting less than 10 minutes and an increase in those commuting more than an hour. Overall, nearly 9% of residents spend 60 minutes or more commuting each day.

*Table: Travel Time*

	2010	2018	Difference	Change
Workers 16 Years and Older (did not work at home)	793,687	884,332	90,645	11.4%
Less than 10 minutes	9.0%	7.3%	-1.7%	-18.9%
10 to 29 minutes	47.9%	47.8%	-0.1%	-0.2%
30 to 59 minutes	36.1%	36%	-0.1%	-0.3%
60 or more minutes	7.1%	8.8%	1.7%	23.9%
Mean travel time to work (minutes)	26.8	28.4	1.6	6.0%
Source: 2006-2010, 2014-2018 ACS 5-Yr Estimates (S0801)				

# Housing Profile

## Housing Stock

Throughout Broward County, one-unit detached structures make up a plurality of all housing units. Since 2010, the housing stock in the County has remained relatively stable. There has been little fluctuation in the percentage of housing units by type.

HUD defines a single-family structure as a structure with one to four units. Using that definition, approximately 56.4% of all housing units are single-family. An important group of property types are called the “Missing Middle” and represent housing types that are neither 1-unit or large complexes with 20 or more units. These units tend to provide affordable housing options for many residents but are rare in many communities. In Broward, approximately 20% of all units are in this important group.

*Table: Property Type in 2010 and 2018*

	2010		2018	
	Number	Percentage	Number	Percentage
1-unit, detached structure	330,550	41.0%	338,096	41.2%
1-unit, attached structure	62,308	7.7%	68,522	8.3%
2 units	23,875	3.0%	20,624	2.5%
3 or 4 units	36,123	4.5%	36,536	4.4%
5-9 units	45,647	5.7%	45,295	5.5%
10-19 units	58,182	7.2%	63,094	7.7%
20 or more units	226,538	28.1%	225,222	27.4%
Mobile Home	23,136	2.9%	23,112	2.8%
Boat, RV, Van, Etc.	499	0.1%	587	0.1%
<b>Total</b>	<b>806,858</b>	<b>100%</b>	<b>821,088</b>	<b>100%</b>

Source: 2006-2010, 2014-2018 ACS 5-Yr Estimates (DP04)

The following table compares unit sizes from 2010 and 2018. In Broward County, there has been very little change in unit size. In 2010, nearly 43% of the County’s housing stock were 3 bedrooms or more. By 2018, the housing stock of large units grew only 1% to 43.9%.

*Table: Unit Size*

	2010		2018	
	Number	Percentage	Number	Percentage
No bedroom	12,863	1.6%	18,758	2.3%
1 bedroom	127,676	15.8%	122,067	14.9%
2 bedrooms	320,714	39.7%	320,401	39.0%
3 bedrooms	229,731	28.5%	240,192	29.3%
4 bedrooms	91,616	11.4%	95,030	11.6%
5 or more bedrooms	24,258	3.0%	24,640	3.0%
<b>Total</b>	<b>806,858</b>	<b>100%</b>	<b>821,088</b>	<b>100%</b>
Source: 2006-2010, 2014-2018 ACS 5-Yr Estimates (DP04)				

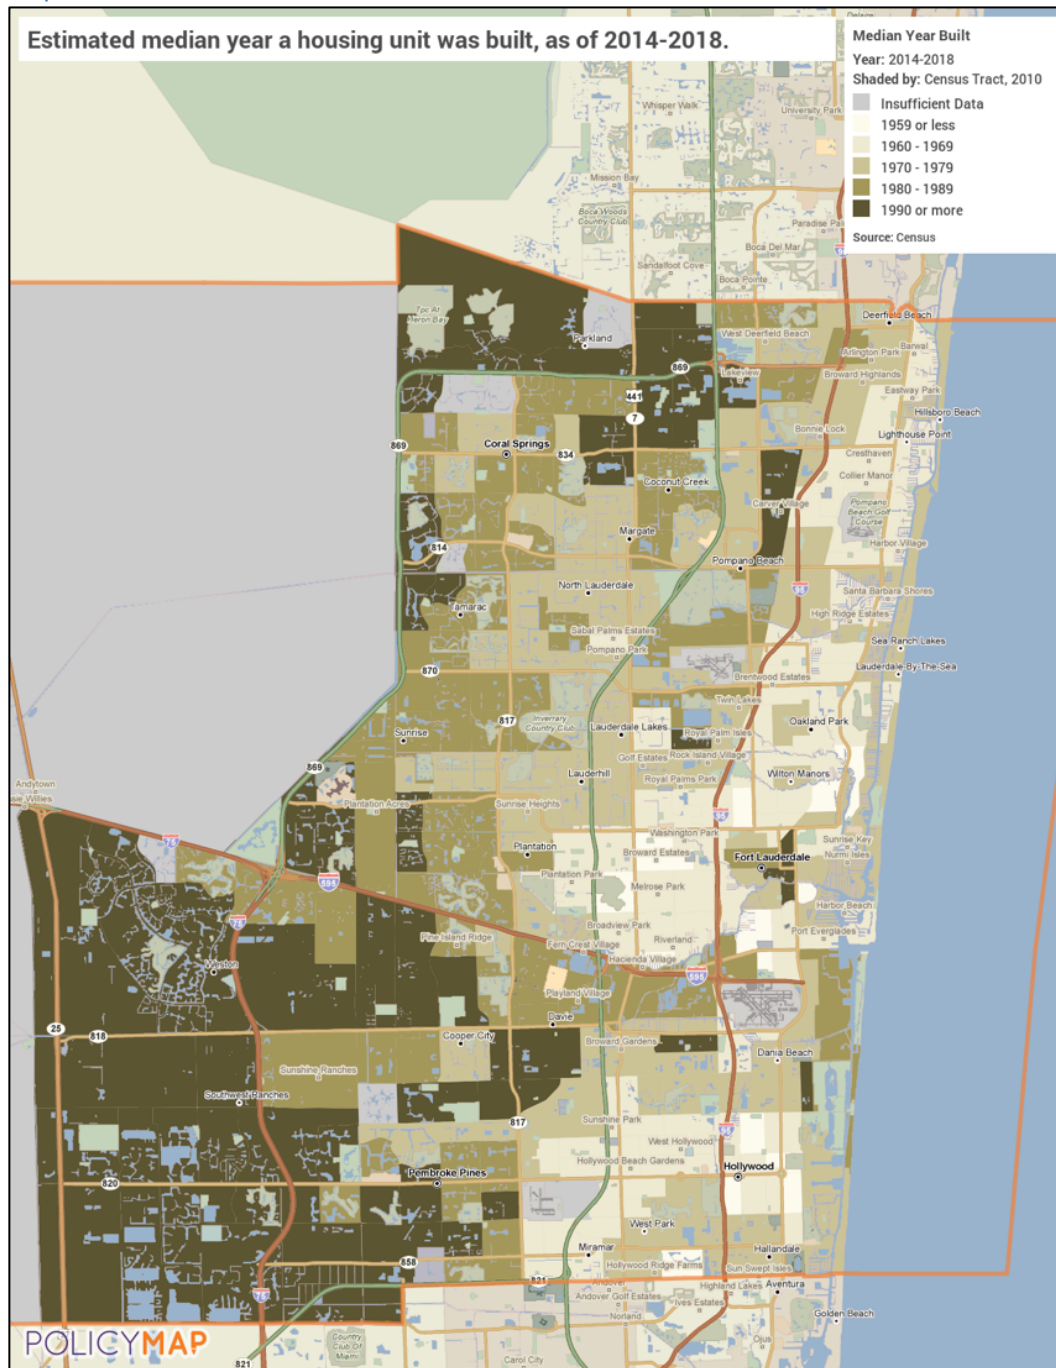

The housing stock in Broward County is relatively young but not nearly as young as the state as a whole. Approximately 13% of the housing units were built after 2000 and nearly 48% were built after 1980. Units built prior to 1980 are at risk of having lead-based paint in them and require special care during rehabilitation. In Broward County, 52.2% of the housing stock was built prior to 1980, or over 428,000 units in the County.

*Table: Year Unit Built*

	Florida		Broward County	
	Number	Percentage	Number	Percentage
Built 2010 or Later	412,422	4.4%	20,597	2.5%
Built 2000 to 2009	1,841,784	19.7%	87,192	10.6%
Built 1990 to 1999	1,601,928	17.1%	133,067	16.2%
Built 1980 to 1989	1,907,366	20.4%	151,729	18.5%
Built 1970 to 1979	1,671,892	17.9%	218,272	26.6%
Built 1960 to 1969	856,245	9.2%	121,051	14.7%
Built 1950 to 1959	662,846	7.1%	73,811	9.0%
Built 1940 to 1949	192,250	2.1%	9,284	1.1%
Built 1939 or earlier	201,956	2.2%	6,085	0.7%
<b>Total</b>	<b>9,348,689</b>	<b>100%</b>	<b>9,348,689</b>	<b>100%</b>
Source: 2014-2018 ACS 5-Yr Estimates (DP04)				

In Broward County, there is a clear trend with newer homes being found in the western part of the County. The housing stock in these newly developing areas have a median year built of 1990 or more. These tracts also tend to have a younger population. By contrast, many tracts near the coast have a median year built of earlier than 1960 and have a generally older population.

Map: Median Year Built

Source: 2014-2018 ACS 5-Yr Estimates via PolicyMap

## Occupancy Characteristics

Housing occupancy has experienced some change in Broward County between 2010 and 2018. The percent of occupied units in the housing stock stayed relatively stable, but occupancy tenure changed. There are approximately 40,000 fewer homeowners in the County now than in 2010. That is a decrease of over 7%.

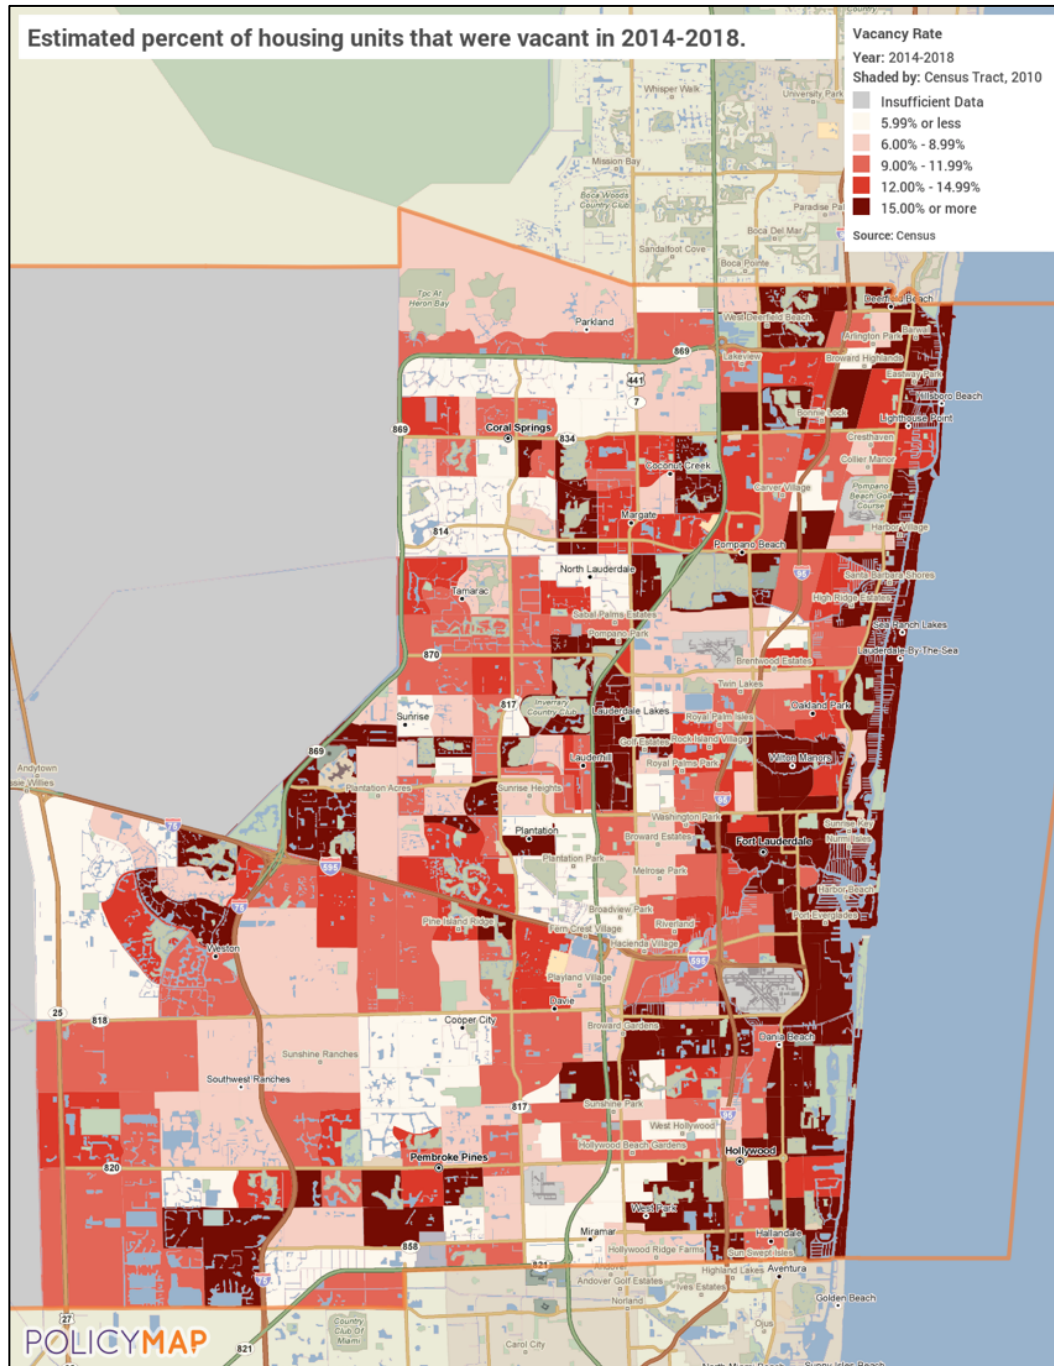

*Table: Housing Occupancy in 2010 and 2018*

	2010		2018	
	Number	Percentage	Number	Percentage
Total Housing Units	806,858	--	821,088	--
<b>Occupied Housing Units</b>	<b>668,898</b>	<b>82.9%</b>	<b>682,088</b>	<b>83.1%</b>
<i>Owner Occupied Units</i>	<i>463,511</i>	<i>69.3%</i>	<i>423,316</i>	<i>62.1%</i>
<i>Renter Occupied Units</i>	<i>205,387</i>	<i>30.7%</i>	<i>258,772</i>	<i>37.9%</i>
<b>Vacant Units</b>	<b>137,960</b>	<b>17.1%</b>	<b>139,000</b>	<b>16.9%</b>
Source: 2006-2010, 2014-2018 ACS 5-Yr Estimates (DP04)				

Throughout Broward County the vacancy rate varies considerably. In general, coastal tracts have a higher vacancy rate than other areas with over 15%. Lower vacancy rate tracts are most common further inland where the rate is less than 6% in some areas. It should be noted that a property that is only used as a vacation or seasonal home is considered “vacant”. Deerfield Beach has the highest citywide vacancy rate with 23.4%.

Map: Vacancy Rate

Source: 2014-2018 ACS 5-Yr Estimates via PolicyMap

## Housing Production

In Broward County, the number of residential construction permits issued in the county varied from year to year but generally trended upwards. The three years with the highest price per unit were 2010, 2016, and 2018. Two of these years, 2016 and 2018, also had some of the highest production of 1-unit structures. From 2010 to 2018, the average price per unit of 1-unit structures increased by 42.5% while the average price per unit of 5+ units structures increased by only 13%.

*Table: Construction Permits Issued in Broward County*

	1-Unit		2-Units		3-4 Units		5+ Units		Total	
	#	PPU	#	PPU	#	PPU	#	PPU	#	PPU

In Broward County, housing sales dropped significantly from 2005 to 2008. This housing market crash was felt throughout the country. Beginning in 2009 the market started expanding again until 2014. Since then, sales have declined.

*Graph: Housing Sales by Year from 2005-2017*

Source: PolicyMap & Zillow

Costs

The following section examines data on housing costs for owners and renters across the County between 2010 and 2018. The median home value of owner-occupied units decreased by nearly 2% while the median rent increased by almost 15%. This presents a situation where homeowners have less capital now than they did in the past and renters are paying more than before.

*Table: Housing Costs in 2010 and 2018*

	2010	2018	% Change
Median Home Value	\$247,500	\$243,100	-1.8%
Median Gross Rent	\$1,133	\$1,332	14.9%
Source: 2006-2010, 2014-2018 ACS 5-Yr Estimates (DP04)			

In 2018, the median home value was less in Broward than it was in 2010. As noted above, the housing market has been contracting in the County since 2014. Between 2010 and 2018 the distribution of homes based on price available remained fairly steady. There were some slight changes with fewer homes in the \$200,000 to \$299,999 range and more units for less than \$100,000.

*Table: Median Home Value for Owner Occupied Units*

	2010		2018	
	Number	Percentage	Number	Percentage
Less than \$50,000	21,978	4.7%	25,709	6.1%
\$50,000 to \$99,999	42,874	9.2%	44,366	10.5%
\$100,000 to \$149,999	47,551	10.3%	45,250	10.7%
\$150,000 to \$199,999	61,536	13.3%	56,227	13.3%
\$200,000 to \$299,999	108,433	23.4%	88,167	20.8%
\$300,000 to \$499,999	119,264	25.7%	108,074	25.5%
\$500,000 to \$999,999	50,017	10.8%	44,215	10.4%
\$1,000,000 or more	11,858	2.6%	11,308	2.7%
Total Units/Median Value	463,511	\$247,500	423,316	\$234,100
Data Source: 2006-2010 & 2014-2018 American Community Survey 5-Year Estimates (DP04)				

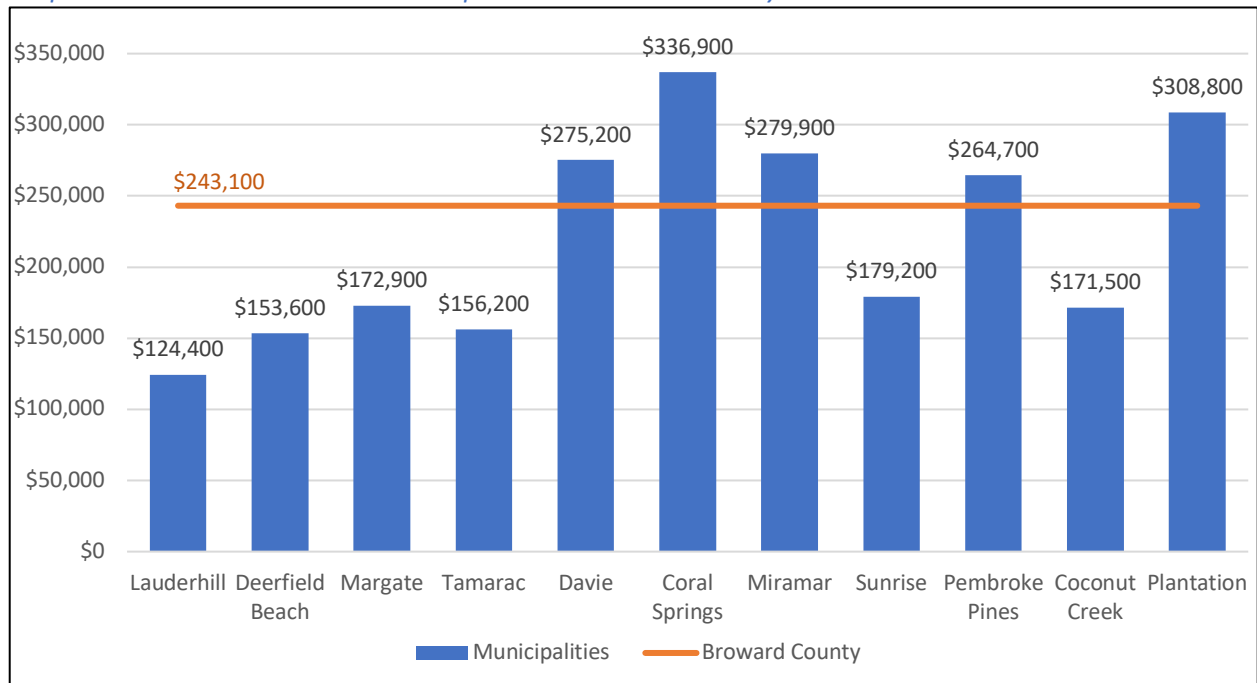

The following graph visualizes the data presented above. As noted previously, there have been only limited changes in the median home values or distribution since 2010.

*Graph: Median Home Value by Price Range Comparison, 2010 & 2018*

Source: 2006-2010, 2014-2018 ACS 5-Yr Estimates (DP04)

*Graph: 2018 Median Home Value Comparison in Broward County*

Source: 2014-2018 ACS 5-Yr Estimates (DP04)

Home values are much higher in the western and coastal parts of the County. In the high value areas, the median value is over \$450,000. The highest citywide median home value is found in Coral Springs where the median home value is \$336,900. This is a stark contrast to the median home value in census tracts of the County’s central corridor that are one-third that or less. As seen previously in this analysis, the parts of the County that report lower home values also have higher than average poverty rates and larger population of Black or African American residents.

Map: Median Home Value

Source: 2014-2018 ACS 5-Yr Estimates via PolicyMap

As mentioned previously, rents have increased throughout Broward County even as home values have decreased. Renters are more likely to be cost burdened and have housing instability. The number of rental units available for less than \$1,000 decreased substantially between 2010 and 2018. In 2010, approximately 37% of all rental units in the County were less than \$1,000 per month, a figure that dropped to 21% in 2018. This reduction in the availability of rental units in this affordability bracket can create a severe impediment to housing choice for low-income residents.

Graph: Median Rent

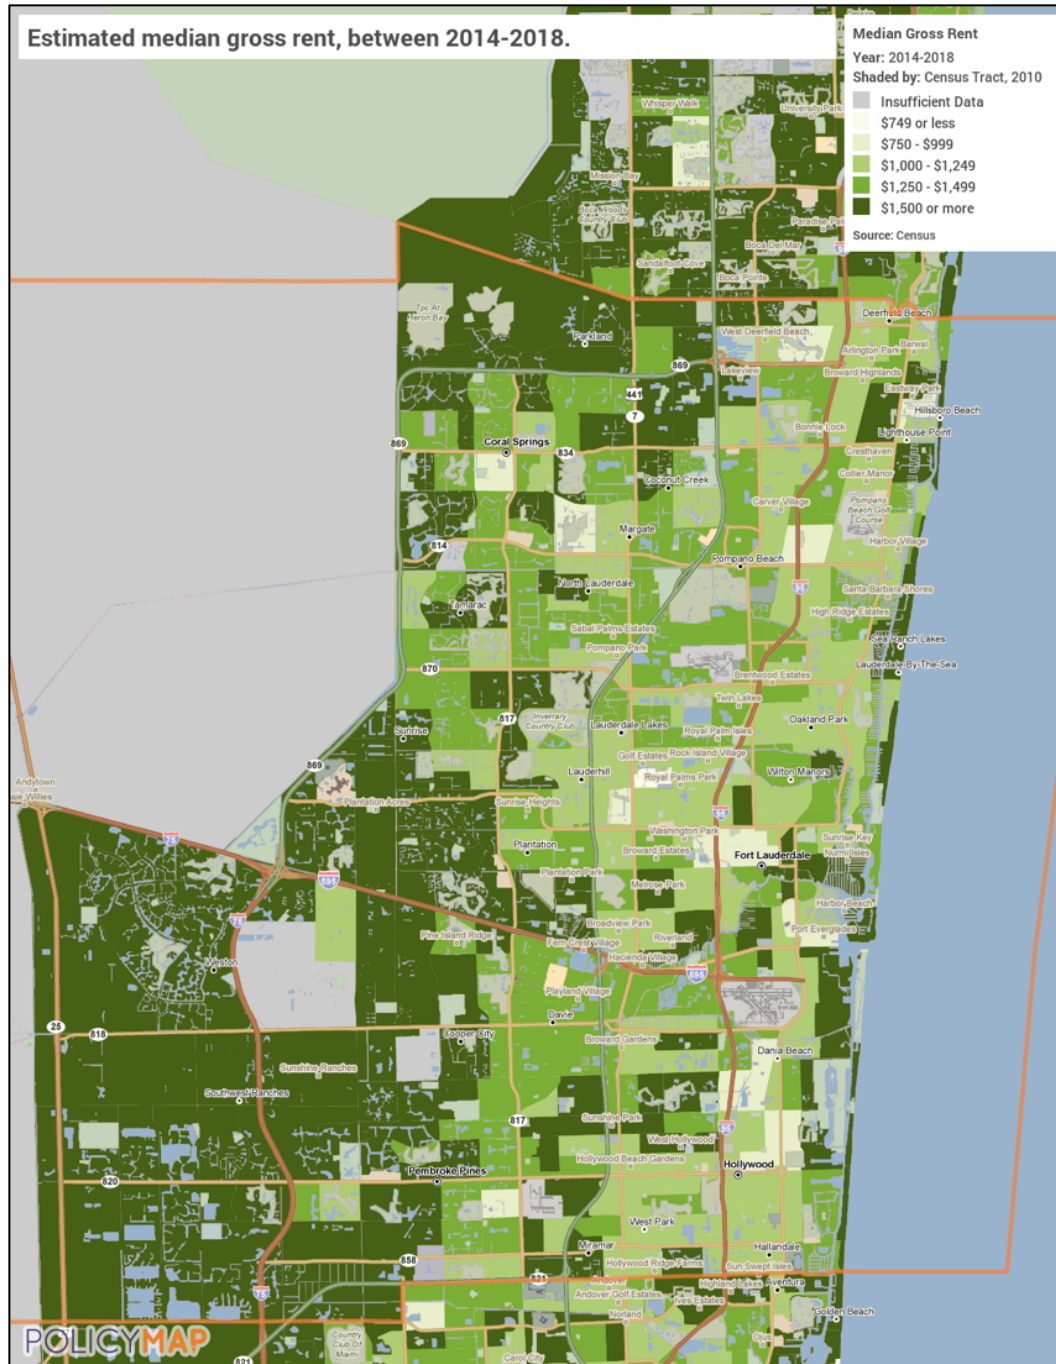

Source: 2006-2010, 2014-2018 ACS 5-Yr Estimates (DP04)

Median rent in Broward County shows a geographic pattern that is similar to median home values. The western and coastal parts of the county have much higher rents than elsewhere, over \$1,500. Central tracts are lower, generally under \$1,250.

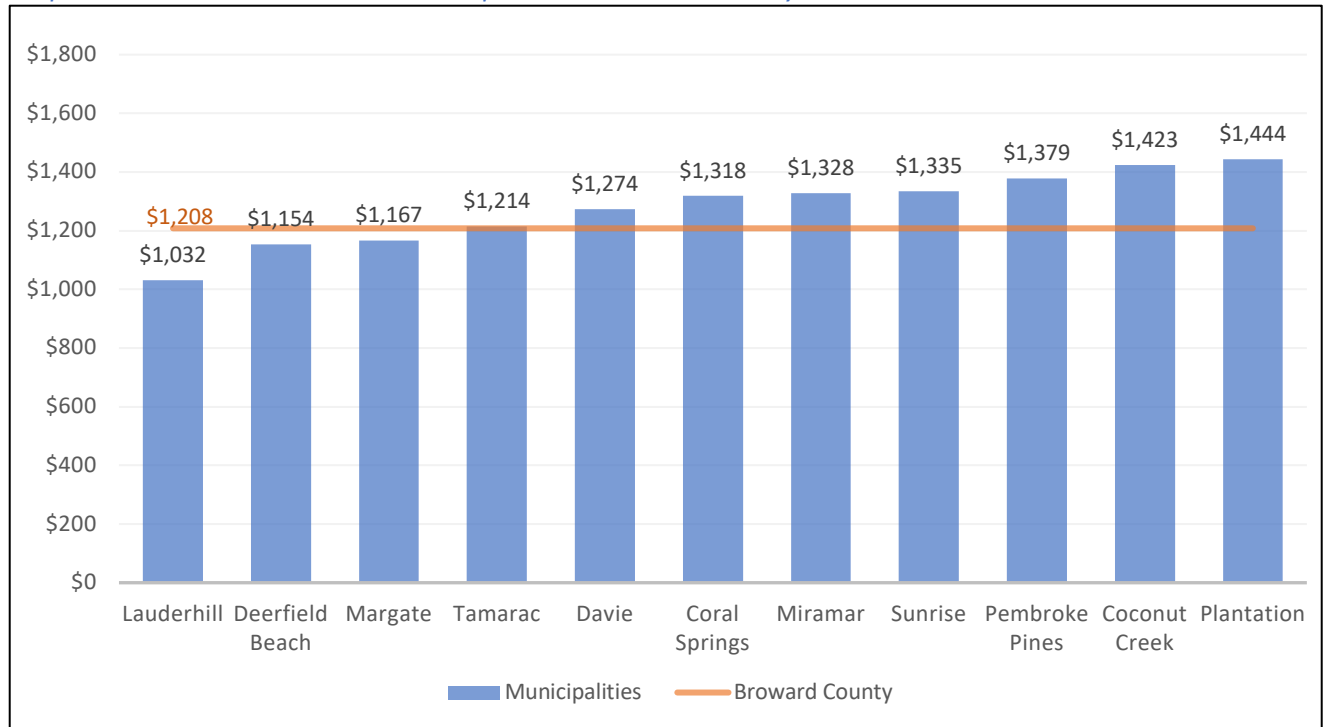

Map: Median Rent

Source: 2014-2018 ACS 5-Yr Estimates via PolicyMap

The range between median rents among municipalities is approximately \$400 with Lauderhill with the lowest and Plantation with the highest. Overall, this is not a very large range among municipalities. Each jurisdiction is within 13-20% of the County median.

## Public Sector Analysis

### Overview

The U.S. Department of Housing and Urban Development (HUD) recommends that the Analysis of Impediments to Fair Housing Choice investigate multiple housing factors in the public sector. Community features, including public services and facilities, and the location of public and assisted housing are aspects of desirable neighborhoods, the demand for which is heightened.

### Zoning and Land-Use

The Fair Housing Acts, as amended, make it unlawful for municipalities to use their governmental powers, including zoning and land-use authority, to discriminate against racial minorities or persons with disabilities. Zoning ordinances codify uses and make differentiations within each use classifications. While many zoning advocates assert that the primary purpose of zoning and land-use regulation is to promote and preserve the character of communities, inclusionary zoning can also promote equality and socioeconomic diversity. Land use zoning is one of the most powerful tools planners have to effectuate change and foster socioeconomic and land use diversity. But the reverse is also true: zoning and land-use planning measures may also have the effect of excluding lower-income and racial minority groups. Local elected officials and government staff directly influence whether a community develops and commits to housing goals and objectives.

Zoning ordinances aimed at controlling the placement of group homes are one of the most litigated areas of fair housing regulations. Nationally, advocates for the disabled, homeless and those with special needs have filed complaints against restrictive zoning codes that narrowly define "family" for the purpose of limiting the number of non-related individuals occupying a single-family dwelling unit. For many people who are disabled, the group home arrangement/environment provides the only affordable housing option for residential stability and more independent living. By limiting the definition of "family" and creating burdensome occupancy standards, disabled persons may suffer discriminatory exclusion from prime residential neighborhoods.

### Multi-Family Housing Units

Public or assisted housing can exist in several forms, including low-income housing projects, housing voucher programs, and supportive housing. The objective of public and other forms of assisted housing is to provide housing that is suitable for persons with special needs or families of low- to moderate-income levels and to promote access to jobs, transportation and related community resources. Uneven distribution of public and assisted housing can be the result of an impediment such as land use policies that discourage multi-family or low-income housing in some areas, thus leading to segregation of low-income and other populations.

## Low-Income Housing Tax Credit Program

The Low-Income Housing Tax Credit (LIHTC) Program is designed to promote investment in affordable rental housing by providing tax credits to developers of qualified projects. To qualify for the tax credits, housing projects must be residential rental properties in which a proportion of available units are rent-restricted and reserved for low-income families. The exact proportions of units that need to be reserved for low-income families for a project to qualify for LIHTC credits varies according to which threshold the property owner elects to implement: at least 20 percent of housing units must be occupied by families with incomes equal to or less than the area median income (as determined by HUD) according to the 20-50 rule, while at least 40 percent of units must be reserved for families earning less than 60 percent of the area median income if the property owner elects to follow the 40-60 rule. Area median incomes are adjusted for household size. Property owners are required to maintain rent and income restrictions for at least 30 years, pursuant to the HUD-mandated minimum affordability period, though in some areas they are required to operate under these restrictions for longer time periods.

## Section 8

Housing assistance is also available to low-income families through the Section 8 Program. Rent subsidies that are available through Section 8 include Housing Choice Vouchers and Project Based Section 8 housing. Unlike Project-Based Section 8 assistance, which subsidizes specific properties, vouchers are portable: recipients can choose where to live as long as the landlord accepts the vouchers and the unit meets a certain set of HUD-defined criteria, including maximum income limits and the “reasonableness” of the monthly rent charges as compared to units in the private market. The program covers monthly rental costs minus the tenant’s contribution, which is not to exceed 30 percent of his or her monthly adjusted income, or 10 percent of monthly unadjusted gross income.

## Promoting Fair Housing and Fair Lending

### U.S. Department of Housing and Urban Development

In 1965, the Department of Housing and Urban Development (HUD) became a Cabinet-level agency. The Civil Rights Act of 1968 made most types of housing discrimination illegal and gave HUD “enforcement responsibility” when dealing with fair housing practices. The official website for HUD states that the department’s primary purpose is to “promote non-discrimination and ensure fair and equal housing opportunities for all.” HUD’s main responsibilities involve “implementing and enforcing a wide array of civil rights laws, not only for members of the public in search of fair housing, but for HUD funded grant recipients as well,” and are enforced by a group of laws known as the Civil Rights Related Program Requirements, or CRRPRs.

HUD-funded grant recipients are obligated by law not to discriminate “in housing or services directly or indirectly on the basis of race, color, religion, sex, national origin, age, familial status, or disability.” According to the Fair Housing Act (FHA), the secretary of HUD “shall administer

programs and activities relating to housing and urban development in a manner that affirmatively furthers the policies outlined” within sections of the Act. Some examples of these programs and activities include but are not limited to offering counseling programs, establishing fair housing enforcement organizations in areas of need, working with housing providers, and encouraging banks and lenders to use more non-traditional credit evaluation methods.

The amended Housing and Community Development Act of 1974 is the primary law for the Community Development Block Grant (CDBG) Program. Under this act, every grant recipient is responsible for assuring HUD that the grant will be carried out in a manner that affirmatively furthers fair housing. CDBG recipients are required to:

1. Examine and attempt to alleviate housing discrimination within their jurisdiction
2. Promote fair housing choice for all persons
3. Provide opportunities for all persons to reside in any given housing development, regardless of race, color, religion, sex, disability, familial status, or national origin
4. Promote housing that is accessible to and usable by persons with disabilities
5. Comply with the non-discrimination requirements of the Fair Housing Act

HUD’s Super Notice of Funding Availability (SuperNOFA) provides funds to ensure that HUD and grantees work toward furthering fair housing and decreasing housing discrimination.

### *HUD and Fair Lending*

Fair lending plays a major role in fair housing. The FHA states that it is unlawful to discriminate in the following ways based on race, color, national origin, religion, sex, familial status or disability:

- Refuse to make a mortgage loan
- Refuse to provide information regarding loans
- Impose different terms of conditions on a loan, such as different interest rates, points, or fees
- Discriminate in appraising properties
- Refuse a loan or set different terms of conditions for purchasing a loan

HUD investigates claims of lending discrimination at no charge. “HUD has conducted a number of studies to determine whether minority homebuyers receive the same treatment and information as whites during the mortgage lending process.” HUD also addresses issues such as subprime lending, predatory lending and minority homeownership.

(Source: <http://portal.hud.gov/hudportal/HUD>)

## Community Development Block Grant (CDBG)

Entitlement Grants are awarded to urban communities on a formula basis to support affordable housing and community development activities. The Community Development Block Grant (CDBG) program is used to plan and implement projects that foster revitalization of eligible communities. The primary goal of the program is the development of viable communities. Program objectives include the provision of decent housing, a suitable living environment, and expanded opportunities principally for low- to moderate-income individuals and families. Broward County provides funding county wide through CDBG to Urban County Participating cities and unincorporated areas of central Broward County. The geographic areas served under CDBG are the Urban County Participating cities of Cooper City, North Lauderdale, Lauderdale Lakes, Lauderdale by-the-Sea, Oakland Park, Wilton Manors, Parkland, Lighthouse Point, Dania Beach, Hallandale Beach, Pembroke Park and West Park. The unincorporated areas of central Broward County are also served. They include neighborhoods such as Boulevard Gardens, Washington Park, Franklin Park, and Roosevelt Gardens. The County receives CDBG allocation directly from HUD. Activities include:

- Acquisition/rehabilitation
- Homebuyer assistance
- Homeless assistance
- Economic development
- Public improvements
- Public services

## HOME Investment Partnership Program

The HOME Investment Partnerships Program (HOME) is authorized under Title II of the Cranston-Gonzalez National Affordable Housing Act, as amended. Program regulations are at 24 CFR Part 92. HOME “provides formula grants to states and localities that communities use – often in partnership with local nonprofit groups – to fund a wide range of activities including building, buying, and/or rehabilitating affordable housing for rent or homeownership or provide direct rental assistance to low-income people.” Broward County provides HOME funding to entitlement cities participating in the HOME Consortium. Funds are allocated primarily to urban county participating cities. Actual allocation amounts are generated by their population, socio-economic and demographic data qualifiers. The HOME Program operates under a consortium which includes eleven entitlement jurisdictions; Coconut Creek, Coral Springs, Deerfield Beach, Margate, Tamarac, Sunrise, Plantation, Lauderhill, Davie, Pembroke Pines and Miramar.

## Emergency Solutions Grant (ESG)

The Emergency Solutions Grant (ESG) is a Federal grant that was established by the Homeless

Housing Act of 1986, in response to the growing issue of homelessness among men, women & children in the United States. In 1987, the ESG program was incorporated into subtitle B of title IV of the McKinney-Vento Homeless Assistance Act (42 U.S.C. 11371-11378). The ESG program is administered by Broward County's Housing Finance & Community Redevelopment Division.

The objectives of the Emergency Solutions Grant program are:

- Increase the number and quality of emergency shelter and transitional housing facilities for homeless individuals and families
- Operate these facilities
- Provide essential social services
- Help prevent homelessness

The four main ESG Program Eligible Activities are:

- Homeless Prevention
- Essential Services
- Operational and Maintenance
- Renovation, Rehabilitation, and Conversion

## Evaluation of Public Sector Policies

Broward County and many of its cities have implemented several important public policies that strive to address the housing needs of County residents. Some important policies that have made positive impacts on the housing market include:

### **1. Expanded School Board Educational Impact Fee Waiver**

The Broward County School Board's Growth Management Policy modified the parameters of the District's school impact fee waiver for low and very low-income affordable housing units eligible for a full waiver up to \$50,000 per project.

### **2. Support of Bonus Density for Affordable Housing**

The County offers a bonus density program for affordable units through the Broward County Land Use Plan. The program enables bonus units to be granted for parcels with commercial future land use map designations and in other areas identified in the land development regulations. Several cities identified later in this analysis have also adopted this important practice.

### **3. Established Affordable Housing Trust Fund**

Broward County voters recognized the need for increase funding for affordable housing by endorsing the establishment of a local trust fund earmarked for alleviating the shortage of

affordable units and addressing homelessness. Since voter approval, the Broward County Commission has provided \$15 million in annual funding.

#### **4. Coordinated Efforts to Address Homelessness**

Broward County has demonstrated a commitment to end homelessness. There are over 15 agencies throughout the County that serve homeless and special needs populations. Outreach, education, point-in-time counts, funding drives, treatment, referral services and other related activities are on-going throughout Broward County. In addition, the County allocates millions of dollars annually from its General Fund for services and interventions that fund operations and programs to address the needs of homeless persons. Nevertheless, there are more homeless people in Broward County than there are shelters and facilities to assist.

#### **5. Provide Faster Delivery of Services and Benefits**

The County funds a one-stop mainstream State benefits service via 211. As a result, Continuum of Care Program participants are more efficiently screened and receive benefits an average of 60% faster than the past.

#### **6. Enacted Landlord Registration and Rental Property Inspection Program**

The County requires all owners of residential rental homes, buildings, and units, with intentions to lease, sublease, or rent to apply for and obtain an annual Residential Rental Certificate of Use. This registration provides code enforcement personnel the ability to contact landlords to facilitate health and safety violations, minimum housing code complaints or emergency situations at residential rental units. The program also requires properties to pass an annual exterior property maintenance and community standards inspection.

#### **7. Created Broward Housing Council**

The County has been proactive in seeking regional collaboration to address affordable housing issues. In 2018, the County established the Broward Housing Council to serve in an advisory capacity to the County Commission and to facilitate coordination between the County, municipalities, the business community and not-for-profit groups to address housing issues including affordable housing, workforce housing and homelessness.

#### **8. Implemented State of Florida Save Our Homes Policy**

This State constitutional benefit limits the annual assessment increase on Homestead properties to no more than 3% or the percentage change in the Consumer Price Index, whichever is less. This measure has resulted in the median home value in Broward County increasing less than half of the increase in the national median home value since 2012.

*Table - Impact of Save Our Homes Policy on Median House Value Since 2012*

Year	State of Florida CPI	Broward County Median Home Value	U.S. Median Single- Family Home Value
2012	3.0%	\$181,400	\$181,600
2018	2.1%	\$204,900	\$259,900
2012 – 2018 Percent Change	<b>11.9%</b>	<b>12.9%</b>	<b>43.1%</b>

Source: Florida Department of Revenue; U.S. Census American Community Survey 2012, 2018.

## **10. Encourage Affordable Housing in Commercial Sites**

In 2019, the County amended the land use policy to encourage affordable housing construction on commercial sites near major roads. The recent policy addition requires that developments include a residential component with affordable housing if the project is located in certain high traffic areas. The change allows developers to build up to 19 market rate units for each affordable unit reserved for tenants with a very low income. The policy also incentivizes municipalities to conform to the County’s land use code in return for the municipality receiving an increase in revenue from the County’s transportation sales tax.

## Private Sector Analysis

### Lending Practices

Countywide lending practices were analyzed using data gathered from lending institutions in compliance with the Home Mortgage Disclosure Act (HMDA). The HMDA was enacted by Congress in 1975 and is implemented by the Federal Reserve Board as Regulation C. The intent of the Act is to provide the public with information related to financial institution lending practices and to aid public officials in targeting public capital investments to attract additional private sector investments.

Since enactment of the HMDA in 1975, lending institutions have been required to collect and publicly disclose data regarding applicants including: location of the loan (by Census tract, County, and MSA); income, race and gender of the borrower; the number and dollar amount of each loan; property type; loan type; loan purpose; whether the property is owner-occupied; action taken for each application; and, if the application was denied, the reason(s) for denial. Property types examined include one-to-four family units, manufactured housing and multi-family developments.

HMDA data is a useful tool in accessing lending practices and trends within a jurisdiction. While many financial institutions are required to report loan activities, it is important to note that not all institutions are required to participate. Depository lending institutions – banks, credit unions, and savings associations – must file under HMDA if they hold assets exceeding the coverage threshold set annually by the Federal Reserve Board, have a home or branch office in one or more metropolitan statistical areas (MSA), or originated at least one home purchase or refinancing loan on a one-to-four family dwelling in the preceding calendar year. Such institutions must also file if they meet any one of the following three conditions: status as a federally insured or regulated institution; originator of a mortgage loan that is insured, guaranteed, or supplemented by a federal agency; or originator of a loan intended for sale to Fannie Mae or Freddie Mac. For-profit, non-depository institutions (such as mortgage companies) must file HMDA data if: their value of home purchase or refinancing loans exceeds 10 percent of their total loan originations or equals or exceeds \$25 million; they either maintain a home or branch office in one or more MSAs or in a given year execute five or more home purchase, home refinancing, or home improvement loan applications, originations, or loan purchases for properties located in MSAs; or they hold assets exceeding \$10 million or have executed more than 100 home purchase or refinancing loan originations in the preceding calendar year.

It is recommended that the analysis of HMDA data be tempered by the knowledge that no one characteristic can be considered in isolation, but must be considered in light of other factors. For instance, while it is possible to develop conclusions simply based on race data, it is more accurate when all possible factors are considered, particularly in relation to loan denials and loan pricing. According to the FFIEC, “with few exceptions, controlling for borrower-related factors reduces the differences among racial and ethnic groups.” Borrower-related factors include income, loan

amount, lender, and other relevant information included in the HMDA data.

The following analysis is provided for the Broward County, Florida summarizing 2017 HMDA data and data between 2007 and 2017 where applicable. Where specific details are included in the HMDA records, a summary is provided below for loan denials including information regarding the purpose of the loan application, race of the applicant and the primary reason for denial. For the purposes of analysis, this report will focus only on the information available and will not make assumptions regarding data that is not available or was not provided as part of the mortgage application or in the HMDA reporting process.

### 2017 County Overview

In 2017, there were approximately 82,500 applications within Broward County for home loans to purchase, refinance or make home improvements for a single family home - not including manufactured homes. Of those applications, over 37,000 or 45 percent were approved and originated. This represents a decrease of approximately 3,500 originations from 2016 and a percentage decrease of approximately 9 percent, a smaller decline than the national decrease of 13 percent. Of the remaining 45,340 applications, approximately 14,650 or 18 percent of all applications were denied. The top two application denial reasons within the County were debt-to-income ratio (30 percent) and credit history (24 percent), representing over half of the County's total denials. Lack of collateral and incomplete applications represented 18 percent and 14 percent of denials respectively. It is important to note that financial institutions are not required to report reasons for loan denials, although many do so voluntarily. Also, while many loan applications are denied for more than one reason, HMDA data reflects only the primary reason for the denial of each loan. The balance of the approximately 30,700 applications, that were not originated or denied, were closed for one reason or another including a) the loan was approved but not accepted by the borrower, b) the application was closed because of incomplete information or inactivity by the borrower or c) in many instances the application may have been withdrawn by the applicant.

**Disposition of Application by Loan Type and Purpose, 2017**  
**Single Family Homes (excluding manufactured homes)**

	Loan Type	Home Purchase	Refinance	Home Improvement
<b>Total Applications</b>				
	Conventional	29,348	23,842	5,127

Source: 2017 HMDA

A further examination of the 14,658 denials within Broward County during 2017 indicates that approximately 47 percent were for applicants seeking to refinance existing mortgages for owner-occupied, primary residences. The number one reason for denial of refinance applications was debt-to-income ratio (30 percent of refinance denials), followed by credit history and incomplete credit applications, both at 20 percent of all refinance denials). Lack of collateral represented 15 percent of all refinance denials. Typically, homeowners, seeking to refinance their existing home mortgage are able to use their home as collateral. When the denial reason given for a refinance

is a lack of collateral, this could indicate the home is worth less than the existing mortgage and, therefore, refinancing is not an option – these homes are commonly referred to as “under-water” or the borrowers are “upside-down” in their mortgage. Shown below, the percentage of refinance denials given for the reason of lack of collateral has declined significantly since the peak of the housing crisis, suggesting that the number of “under-water” homes in Broward County has declined since 2009.

### Home Purchase Lending in Broward County

Of the 23,319 home purchase loans for single family homes that were originated in 2017, approximately 69 percent of these originations were provided by conventional lenders, slightly higher than the national conventional home purchase share of 64 percent. The remaining 31 percent of home purchase loans in Broward County were provided by federally-backed sources such as the Federal Housing Administration (FHA) and the Department of Veterans Affairs (VA). Nonconventional loans, including the FHA and VA lending programs, have relatively lower down-payment requirements in comparison to conventional lenders. The FHA and VA lenders had application/origination ratios of 45 percent and 48 percent respectively. Conventional lenders, by contrast, originated home purchase loans at a higher 55 percent of all applications.

### Home Purchases by Type, 2017

	<i>Originations</i>	<i>Share of Total</i>	<i>Approval Rate</i>
<b>Conventional</b>	16,085	69.0%	54.8%
<b>FHA</b>	6,022	25.8%	45.3%
<b>VA</b>	1,212	5.2%	48.7%
<b>Total</b>	<b>23,319</b>		

The share of applications and percentage of loan application denials for traditional home purchase loans in Broward County varies by race/ethnic groups. The largest applicant group in 2017 were non-Hispanic Whites (41 percent) followed by Hispanics (34 percent). Blacks represented 19 percent of all home purchase applications while Asian applicants represented 4 percent. In 2017, Whites and Asians were least likely to be denied for conventional single family home purchases, with both groups being denied at a rate of 12 percent. Hispanics were denied at a rate of 14 percent, while Black applicants faced the highest conventional home purchase denial rate at 19 percent.

Additionally, a closer look at home purchase denial rates by race/ethnicity and income group within Broward County, shown below, demonstrates that High Income Whites and Asians (having greater than 120 of Area Median Income) were the least likely to be denied for a single family home purchase, at 10 percent. Low Income Blacks (having less than 80 percent of Area Media

Income) were the group with the highest home purchase denial rate at 24 percent. Asian applicants had the highest disparity in income-based denial rate differences at 12 percent, while White applicants had the lowest difference at 7 percent.

Application Denial Reasons by Income Group

The below charts compare denial reasons among White, Black, Hispanic, and Asian applicants in Broward County for 2017 by income group.

As of 2017, the leading denial reason for High Income White applicants was lack of collateral while the top reason for Asian applicants was debt-to-income ratio. For High Income Black and Hispanic applicants, the top denial reason was credit history. In the case of High Income Blacks, credit history denials represented approximately one third of total denials, the highest share for any denial reason across all groups.

For Low Income denials, the top reason for all groups was debt-to-income ratio, with the exception of Black applicants where credit history again had the highest share. All Low Income groups were denied for debt-to-income ratio at a higher rate than their High Income counterparts. In the case of Hispanics, the difference relative to High Income applicants was nearly double. Additionally, Low Income applicants in all groups were less likely to be denied due to lack of collateral and incomplete applications relative to High Income applicants.

### Broward County’s Single Family Lending Market, 2007-2017

The following section will examine HMDA data over the time period 2007-2017, for Broward County.

Highlighted below, the number of single family loan originations in Broward County followed a dynamic trajectory between 2007 and 2017. At the onset of the housing crisis, originations declined 61 percent between 2007 and 2008, followed by a stabilization to around 24,000 originations per year between 2009 and 2011. Subsequently, originations grew by 58 percent between 2011 and 2012. After a 27 percent decrease between 2013 and 2014, originations grew steadily to reach the highest total originations of all years examined at over 40,000. Between 2016 and 2017, originations fell by 9 percent, and as of 2017, total originations in Broward County are about 52 percent of the level prior to the housing crisis.

In contrast to originations, the number of application denials within Broward County demonstrated less extreme changes between 2007 and 2017. As of the most recent data year, denials are nearly three-quarters below the level experienced in 2007. Relatedly, the share of denials as a percent of total originations and total denials has declined markedly since the housing bust, from 43 percent in 2007 to approximately 28 percent as of 2017.

Shown below, much of the year-to-year fluctuations in total originations that occurred between 2007 and 2017 were the result of refinancing originations. Refinancing was the dominant loan purpose in 2007, though home purchase became the dominant loan purpose between 2008 and 2011. Refinance loans grew significantly between 2011 and 2012 as interest rates were broadly falling, discussed further below. Home purchases became the top loan purchase since 2014, and

as of 2017, home purchases and refinances comprised 63 and 33 percent of the County’s total originations respectively. The growth of home purchase originations since 2011 (86 percent growth rate between 2011 and 2017) reflects a steady and recovering demand for housing within the County.

The share of refinance originations in Broward County appears to move generally with the 30-year fixed rate mortgage average, shown below. In 2012, for example, when the average 30-year fixed rate mortgage was at its lowest level of all the years examined, refinance originations reached the highest share in percentage terms of all data years analyzed and highest total of all years excluding 2007. Similarly, when interest rates rose between 2012 and 2014, the share of refinance originations fell from 64 percent to 36 percent. The increase in the annual average of the 30-year fixed mortgage rate between 2016 and 2017 is consistent with Broward County’s 22 percent reduction in the number of refinance loan originations over the same time period.

Source: HMDA, Federal Reserve Bank of St. Louis

### Income, Race, and Single Family Loan Denials in Broward County

Denial rates for single family loans in Broward County over time vary by race and ethnicity. The charts below show that between 2007 and 2017, White applicants were the least likely to be denied relative to all other groups. Additionally, Black applicants were the most likely to be denied relative to other groups for all years analyzed. In addition to the overall denial rate, this pattern is evident in both home purchase and refinance loans.

A view of single family denial rates by applicant income group within Broward County, highlighted below, shows the expected outcome of higher income groups experiencing lower denial rates than lower income groups. However, Very Low Income applicants (50 percent of less of Area Median Income) have remained well above other income groups, with generally increasing divergence since 2012, despite a decrease from 51 percent to 40 percent between 2016 and 2017. As of 2017, High Income (greater than 120 percent of Area Median Income) and Middle Income (80 to 120 percent of Area Median Income) applicants are the lowest and second-lowest denied groups respectively, with Low Income (between 50 percent and 80 percent of Area

Median Income) the third-lowest.

Similar to overall denial rates by income group, home purchase applications were denied at a much higher rate for Very Low Income applicants between 2007 and 2017 while Low, Middle, and High Income applicants have remained closer to each other. As of the most recent data year, Very Low Applicants are nearly 3 times as likely to be denied for a home purchase relative to High Income applicants. For refinance loans, the disparity is approximately double.

Denial rates by neighborhoods income group (defined as median income of property’s Census tract) similarly shows higher income neighborhoods are less likely to be denied compared to lower income neighborhoods.

As a percentage of total applications within Broward County, the distribution among neighborhoods by income group shows that for every year examined, Middle and High Income neighborhoods represented the vast majority of applicants (75 percent as of 2017).

Within Broward County, Very Low Income and Low Income neighborhoods represent 36 percent of the County’s total neighborhoods, although they are represented by approximately 23 percent of total originations and 26 percent of applications as of 2017, shown below. This suggests that Low and Very Low Income neighborhoods within the County are less likely to participate in the single family lending market relative to other neighborhoods. By contrast, loan applications and originations within Broward County are disproportionately likely to occur for properties in Middle and particularly High Income neighborhoods.

## The Subprime Market

Illustrated below, the subprime mortgage market in Broward County declined significantly between 2007 and 2010, dropping by 97 percent. Though subprime originations more than quintupled between 2010 and 2017 to about 3,000 per year, this is still approximately 16 percent of the 2007 total of nearly 20,000. Subprime loans are defined as those with an annual percentage rate that exceeds the average prime offer rate by at least 1.5 percent. The total number of subprime loan originations decreased by approximately 84 percent on net between 2007 and 2017, while prime originations decreased by 35 percent during the same time period. As a percent of Broward County's total, subprime originations declined from 27 percent in 2007 to 9 percent in 2017.

Subprime originations by race/ethnicity show that for every year examined, Black loan recipients had the highest share compared to other groups. Asian loan recipients were the least likely to be subprime, followed closely by Whites. As of 2017, Black loan recipients were more than 3 times as likely to be subprime relative to White loan recipients.

Consistent with broader national trends, the composition of subprime loans within Broward County has shifted from conventional loans to government-insured nonconventional loans in recent years. In 2007, 99.7 percent of subprime loans within the County were originated by conventional lenders. As of 2017, that percentage is 42 percent, up from a low of 19 percent in 2014. Of the nonconventional subprime loans originated in Broward County, over 99 percent are insured by the Federal Housing Administration. By contrast, the FHA’s share of nonconventional prime loans is 74 percent, while the remaining 26 percent are insured by the Department of Veterans Affairs.

Subprime loans have been characterized by growth in home purchases in recent years, particularly from 2014 onward. As a percentage of all subprime loan originations within Broward County, home purchases represented 85 percent in 2017, up from its share of 31 percent in 2007.

Though 58 percent of all subprime loans within Broward County in 2017 were nonconventional, 73 percent of *total* single family originations in 2017 were from conventional lenders. The highest share of nonconventional originations for any loan purpose was for home purchase loans in 2010 at 57 percent. The share of conventional lending in Broward County has stabilized to the low 70 percent range in the last few years.

### Private Lending Conclusion

Mortgage lending activity in Broward County is consistent with many of the broader trends that have occurred in the wake of the housing crash, Great Recession, and subsequent economic recovery.

Further, Broward County exhibits relatively strong mortgage market fundamentals. Home purchase originations nearly doubled between 2011 and 2017, suggesting signs of growing housing demand and a housing market recovery within the County. Additionally, the share of refinance applications denied for lack of collateral, suggesting an “under-water” home, has declined substantially since the peak of the housing crisis.

The County has also been subject to cyclical trends that reflect broader economic conditions in recent years, including changes in mortgage rates that influence the prevalence of refinance originations and a subprime lending market that remains well below its peak prior to the housing bust, despite steady and significant growth since 2010. Government-insured mortgages have increased, consistent with tighter credit conditions and a more active regulatory environment in the wake of the housing crash.

Some trends, however, have continued despite business cycle fluctuations, such as higher denial rates for Black and Hispanic applicants relative to White applicants, in addition to higher denial rates for lower income applicants and neighborhoods.

## Fair Housing Profile

### Federal Fair Housing Laws

Federal laws provide the backbone for U.S. fair housing regulations. A brief list of laws related to fair housing, as defined on the U.S. Department of Housing and Urban Development's (HUD's) website, is presented below:

*Fair Housing Act Title VIII of the Civil Rights Act of 1968 (Fair Housing Act)*, as amended, prohibits discrimination in the sale, rental, and financing of dwellings, and in other housing related transactions, based on race, color, national origin, religion, sex, familial status (including children under the age of 18 living with parents or legal custodians, pregnant women, and persons securing custody of children under the age of 18), and handicap (disability).

*Title VIII was amended in 1988 (effective March 12, 1989) by the Fair Housing Amendments Act.* In connection with prohibitions on discrimination against individuals with disabilities, the Act contains design and construction accessibility provisions for certain new multi-family dwellings developed for first occupancy on or after March 13, 1991.

*Title VI of the Civil Rights Act of 1964.* Title VI prohibits discrimination on the basis of race, color, or national origin in programs and activities receiving federal financial assistance.

*Section 504 of the Rehabilitation Act of 1973.* Section 504 prohibits discrimination based on disability in any program or activity receiving federal financial assistance.

*Section 109 of the Housing and Community Development Act of 1974.* Section 109 prohibits discrimination on the basis of race, color, national origin, sex or religion in programs and activities receiving financial assistance from HUD's Community Development and Block Grant Program.

*Title II of the Americans with Disabilities Act of 1990.* Title II prohibits discrimination based on disability in programs, services, and activities provided or made available by public entities. HUD enforces Title II when it relates to state and local public housing, housing assistance and housing referrals.

*Architectural Barriers Act of 1968.* The Architectural Barriers Act requires that buildings and facilities designed, constructed, altered, or leased with certain federal funds after September 1969 be accessible to and useable by handicapped persons.

*Age Discrimination Act of 1975.* The Age Discrimination Act prohibits discrimination on the basis of age in programs or activities receiving federal financial assistance.

*Title IX of the Education Amendments Act of 1972.* Title IX prohibits discrimination on the basis of sex in education programs or activities that receive federal financial assistance.

## Fair Housing Related Presidential Executive Orders

*Executive Order 11063.* Executive Order 11063 prohibits discrimination in the sale, leasing, rental, or other disposition of properties and facilities owned or operated by the federal government or provided with federal funds.

*Executive Order 11246.* Executive Order 11246, as amended, bars discrimination in federal employment because of race, color, religion, sex, or national origin.

*Executive Order 12892.* Executive Order 12892, as amended, requires federal agencies to affirmatively further fair housing in their programs and activities, and provides that the Secretary of HUD will be responsible for coordinating the effort. The Order also establishes the President's Fair Housing Council, which will be chaired by the Secretary of HUD.

*Executive Order 12898.* Executive Order 12898 requires that each federal agency conduct its program, policies, and activities that substantially affect human health or the environment in a manner that does not exclude persons based on race, color, or national origin.

*Executive Order 13166.* Executive Order 13166 eliminates, to the extent possible, limited English proficiency as a barrier to full and meaningful participation by beneficiaries in all federally assisted and federally conducted programs and activities.

*Executive Order 13217.* Executive Order 13217 requires federal agencies to evaluate their policies and programs to determine if any can be revised or modified to improve the availability of community-based living arrangements for persons with disabilities.

## State and Local Fair Housing Laws

### Florida Fair Housing Act/Florida Commission on Human Relations

The Florida Fair Housing Act was passed by the Florida Legislature in 1983 and amended in 1989. The Florida Fair Housing Act parallels the Federal Fair Housing Act. The Florida Commission on Human Relations (FCHR) is a Fair Housing Assistance Program (FHAP) agency and enforces Florida's state fair housing law. The Florida Fair Housing Act has been certified as substantially equivalent to the federal law. Substantial equivalency certification takes place when a State or local agency applies for certification and the U.S. Department of Housing and Urban Development (HUD) determines that the agency enforces a law that provides substantive rights, procedures, remedies and judicial review provisions that are substantially equivalent to the federal Fair Housing Act.

HUD has a two-phase procedure for the determination of substantial equivalency certification. In the first phase, the Assistant Secretary for Fair Housing and Equal Opportunity determines whether, "on its face," the State or local law provides rights, procedures, remedies and judicial review provisions that are substantially equivalent to the federal Fair Housing Act. An affirmative

conclusion that the State or local law is substantially equivalent on its face will result in HUD offering the agency interim certification. Interim certification is for a term of three years. An agency must obtain interim certification prior to obtaining certification. In the second phase, the Assistant Secretary for Fair Housing and Equal Opportunity determines whether, "in operation," the State or local law provides rights, procedures, remedies and the availability of judicial review that are substantially equivalent to the federal Fair Housing Act. An affirmative conclusion that the State or local law is substantially equivalent both on its face and in operation will result in HUD offering the agency certification. Certification is for a term of five years. During the five years of certification, the agency's ability to maintain certification will be assessed. After the five years of certification, if the Assistant Secretary determines that the agency still qualifies for certification, HUD will renew the agency's certification for another five years.

Substantially equivalent agencies are eligible to participate in the Fair Housing Assistance Program (FHAP). FHAP permits HUD to use the services of substantially equivalent State and local agencies in the enforcement of fair housing laws, and to reimburse these agencies for services that assist in carrying out the spirit and letter of the federal Fair Housing Act. While certification results in a shift in fair housing enforcement power from the federal government to the State or locality, the substantive and procedural strength of the federal Fair Housing Act is not compromised. Prior to certification, an agency must demonstrate to HUD that it enforces a law that is substantially equivalent to the federal Fair Housing Act.

When HUD receives a complaint and the complaint alleges violations of a State or local fair housing law administered by an interim certified or certified agency, HUD will generally refer the complaint to the agency for investigation, conciliation and enforcement activities. Fair housing professionals being based in the locality where the alleged discrimination occurred benefits all parties to a housing discrimination complaint. These individuals often have a greater familiarity with local housing stock and are in closer proximity to the site of the alleged discrimination, offering greater efficiency in case processing.

#### [Broward County Human Rights Ordinance/Broward County Civil Rights Division](#)

Chapter 16½ of the Broward County Code of Ordinances has the purpose of securing freedom from discrimination because of race, color, religion, sex, national origin, age, marital status, political affiliation, familial status, disability, sexual orientation, pregnancy, or gender identity and expression, in connection with employment, public accommodations, and real estate transactions, and to promote the interests, rights, and privileges of individuals within the County. The Broward County Ordinance had received certification from the U.S. Department of Housing and Urban Development (HUD) that the local law provides substantive rights, procedures, remedies and judicial review provisions that are substantially equivalent to the federal Fair Housing Act. The Broward Ordinance does, however, include additional protected classes; political affiliation, pregnancy, sexual orientation and gender identity and expression.

The Broward County Civil Rights Division is responsible for the enforcement of the County's Ordinance. The Division investigates complaints of discrimination in employment, housing, and

public accommodations for individuals in Broward County that violate local and federal statutes. Individuals with a complaint of housing discrimination contact the Intake Section of the Division as the first step to filing a charge complaint of discrimination and are provided with an intake questionnaire. An interview is conducted with the complaining party to determine whether or not the complaint is within the law's jurisdiction prior commencement of investigation.

The Broward Civil Rights Division also makes itself available to provide free training and presentations to interested groups and companies on fair housing, managing discrimination in the workplace, and other topics. This community service program fosters greater understanding of legal rights and responsibilities under the law with a goal of protecting the rights of Broward County residents and to prevent discrimination in Broward County.

## Private Organizations

### Housing Opportunities Project for Excellence, Inc. (HOPE Fair Housing Center)

HOPE is the only private, non-profit, full service, fair housing organization serving Miami-Dade and Broward counties currently engaged in comprehensive education/outreach and enforcement activities. The overall mission of HOPE is to fight housing discrimination in Miami-Dade and Broward counties and to promote equal housing opportunities throughout Florida. HOPE envisions continuing to play a major role in bringing housing discrimination to an end by empowering people through education, advocacy, and the enforcement of federal, state and local fair housing laws. HOPE's Education and Outreach Initiative is designed to ensure that the general public and protected classes become knowledgeable concerning fair housing laws and the means available to seek redress for fair housing rights violations, and includes private housing industry provider education programs structured to furnish developers, real estate brokers, property managers, financial institutions, and the media/advertising industry with the most current information necessary to fully comply with federal, state and local fair housing laws.

The agency's Private Enforcement Initiative involves testing and investigation of alleged fair housing violations in the South Florida area, the prevention and elimination of discriminatory housing practices, and pursuing the enforcement of meritorious claims. The Housing Discrimination HELP LINE provides complaint intake, information and referral services, counseling services, and assistance to South Florida residents seeking housing opportunities in the private housing market.

Fair Housing enforcement activities are necessary for the intake and investigation of individual housing discrimination complaints, as well as exposing patterns and practices of housing discrimination. HOPE fair housing specialists investigate complaints through testing, contact, and evaluation of evidence. Trained testers visit local rental and sales offices (identified in either systemic or complaint-based evaluations) to obtain information regarding availability of housing, costs, and amenities. The results of these tests are evaluated by trained staff to determine if persons of protected classes are receiving equal housing opportunities.

From January 1, 2011 to December 31, 2015, HOPE has received 547 fair housing complaints regarding housing-related service providers in Broward County. HOPE's volunteer testers effectively and impartially gather evidence necessary to substantiate allegations of discrimination. The agency successfully enlists private law firms and legal practitioners to contribute their services on a pro-bono basis for litigation or settlement of housing discrimination cases.

## Fair Housing Complaints

Fair housing complaints can be used as an indicator to identify heavily impacted areas and characteristics of households experiencing discrimination in housing. The Fair Housing Act lists seven prohibited bases for discrimination: race, color, national origin, religion, sex, disability, and familial status. The Fair Housing Act makes it unlawful to coerce, threaten, intimidate or interfere with anyone exercising or aiding others in enjoying their fair housing rights.

The following analysis considers fair housing complaint data filed against respondents in Broward County with the U.S. Department of Housing and Urban Development (HUD) between 2015 and mid-2020. Using this data, the report identifies and analyzes the following:

- The absolute number of complaints filed with HUD in the County
- The basis of complaints filed
- The issues of complaints filed

There are several data limitations while conducting this type of analysis. Though not exhaustive, the list below summarizes the most important limitations of the datasets. The complaint process relies on people self-reporting. The data represent only those complaints that were filed; thus, there exists a likelihood of housing discrimination incidents that are under-reported.

A total of 349 fair housing complaints were filed with HUD between 2015 and April 2020. An overwhelming majority of the complaints were based on housing discrimination due to disability (51%). National origin (19%) and racial discrimination (17%) made up a significant portion of the bases as well. All complaints filed must allege a basis for discrimination.

Source: HUD

Table: Fair Housing Complaints to HUD 2015-April 2020

Violation City	Violation County	Filing Date	Complaint Bases

## Review of Previous Impediments

### Current Analysis of Impediments to Fair Housing Choice

1. Lack of Knowledge of Fair Housing Protections and Redress under Fair Housing Laws
2. Although overall levels of segregation have steadily decreased since 1980, the housing market continues to be segregated at a high level.
3. Limited funding availability to meet the growing need for affordable housing opportunities
4. Violations of federal, state, and local fair housing laws in the jurisdiction, with a significant increase in discrimination against persons with disabilities
5. Fair and Equal Lending Disparities

### Recommended Guidance to Address Prior Barriers

The Affordable Housing Advisory Committee (AHAC) provided several recommendations to the Board of County Commission in 2017 to help eliminate some of the barriers to affordable housing. These recommendations have served as direct guidance on the County's established and improving housing policy and use of federally funded programs. The recommendations are as follows:

- Standardize terms of SHIP Mortgages/Notes.
- Creation of Broward County generated Dedicated Revenue Source to be deposited into a dedicated affordable housing trust fund to be administered by the County.
- Preserve Tax Exemption for Affordable Housing, such as, tax exempt multifamily housing bonds programs.
- Establish a Community Land Trust Initiative [CLT] strategy in the Local Housing Assistance Plan.
- Broward County Board of County Commissioners should advocate for a more appropriate and larger receipt of funds to be returned to the Broward County Affordable Housing Trust Fund based on the need of the County.
- Repurpose Vacant Buildings for affordable housing; sell land
- The BOCC to approve revenue from other and additional revenue sources, such as expiring Community Redevelopment Agencies, Tax Increment Financing [TIF] funds. These revenues to be placed in the Broward County Affordable Housing Trust Fund Account to be used strictly for the development of affordable housing units and to sustain existing affordable housing units in Broward County.

- Mandate legislative action to prohibit the raiding of the Sadowski Housing Trust Fund to allow funding as in the original intent of the Act.
- Support changes to the Florida Housing Finance Corporation rules governing the Low-Income Housing Tax Credit Program to increase Broward County's potential tax credit allocations in the Annual Action Plan 2018 OMB Control No: 2506-0117 (exp. 06/30/2018) 51 State issued Request for Application.
- Increase the Landlord Registration and Rental Property Inspections Program fee from \$75.00 to \$150.00 [similar to fees charged by municipalities throughout Broward County].
- Improve the Bonus Density Program in the Broward County Land Use Plan to increase its effectiveness and generate additional affordable housing units.
- Support the modification of Broward County Charter to reduce timeframes for processing small scale Broward County Land Use Plan map amendments to facilitate affordable housing.
- Encourage Broward County municipalities to expedite affordable housing projects through their land development regulations, (for example through zoning, bonus densities, more flexible units, further parking reductions, impact fee waivers, and expediting permit review) to further affordable housing.

## Fair Housing Related Impediments and Recommendations

This Analysis of Impediments to Fair Housing Choice is an examination of barriers to fair housing choice and outlines specific actions to address these barriers in Broward County and the cities that are part of the HOME Consortium as well as the Cities of Tamarac, Coral Springs, Margate, Deerfield Beach, Sunrise, Lauderhill, Plantation, Davie, Pembroke Pines, Miramar and Coconut Creek. The impediments to fair housing choice are presented in three categories:

- Fair Housing-Related Impediments
- Affordable Housing-Related Impediments
- Fair Housing Action Plan

### Fair Housing-Related Impediments

#### **Impediment 1: Displacement of Minorities Due to Gentrification**

In Broward County, there were 44 census tracts found to have experienced minority displacement from gentrification. While gentrification can have a major impact on economic growth and the social landscape of a county, it often displaces low-income minority communities pushed out of the areas their families have lived in, sometimes for generations. It is important for Broward County's local communities to mitigate the potential negative aspects that often come with gentrification.

#### **Impediment 2: Income Inequality Between Race or Ethnicity**

In Broward County, race or ethnicity is correlated with income. Two groups report a median household income (MHI) greater than the countywide rate: White and Asian households. Black households have the lowest MHI, over \$10,000 less than the median and \$16,000 less than White households. Addressing this inequality needs to be a component in the allocation of public housing funds wherever possible.

### Affordable Housing-Related Impediments

#### **Impediment 3: Decline in Household Purchasing Power**

Since 2010, the purchasing power as measured by household income in the County has decreased by 3% for a family earning the median household income. This is a larger decrease than the statewide decline of 2.3%. There are only two cities in the Consortium that saw the purchasing power of their residents increase: Coconut Creek and Tamarac. The largest drop in purchasing power was in the City of Margate followed by the City of Coral Springs. These declines resulted

in a decline of household's ability to afford, rent and/or purchase housing.

#### **Impediment 4: High Percentage of Renters are Cost Burdened**

Renters are, by far, the most cost burdened group in the County. Over 61% of renters are cost burdened, and 51% of renters pay 35% or more of their income to housing costs. Homeowners have a significantly lower cost burden rate, but there are still households within the County that lack the income necessary for economic security.

#### **Impediment 5: Increased Rate of Poverty**

As the decline in purchasing power reflects in Broward County, the poverty rate has increased from 12.3% to 13.5% between 2010 and 2018. The City of Pembroke Pines had the largest change in poverty rate, growing from 6.4% to 9.4%, or nearly 50% growth. Only three cities reported a decrease in poverty: Coconut Creek, Margate, and Tamarac.

#### **Impediment 6: Funding Shortage for New and Existing Affordable Housing**

Despite creation and funding the Broward County Affordable Housing Trust Fund, there remains a shortage of funding to address affordable housing demand. For example, Home Funds still leave gaps in services for homeless services, and the awarding of Low-Income Housing Tax Credits (LITHC) is limited to two projects per year in Broward County by the State of Florida. Compounding this need is the fact that financing the preservation of affordable housing projects is increasingly difficult from private institutions. This factor places more demand for funding support from local communities and public agencies.

## Fair Housing Action Plan

Several of these recommended fair housing actions have been initiated by the County and some of the municipal jurisdictions within Broward County. The most common practices among the cities and towns affordable housing policies are:

1. Expedited permitting for affordable housing projects;
2. Participation in the Broward County Home Buyer Assistance program; and
3. Offering housing rehabilitation loans.

All Broward County municipal jurisdictions are recommended to embrace these practices for the benefit of supporting affordable housing; encouraging home ownership among lower income households; and maintaining the quality of their city's housing stock.

The following Tables "Fair Housing Actions Matrix" identify those cities, towns and villages where specific housing policies have been adopted. Because of the number of local jurisdictions in this analysis and the diversity of affordable housing practices, the most predominant policies are summarized in two tables.

- Table X-1 indicates funding and financial-related housing incentive programs and administrative practices that directly contribute to stimulating or expanding the development of affordable housing. The most widely utilized incentives for affordable housing offered by Broward County and the Consortium Cities are the Broward County Home Buyer Assistance Program (20 jurisdictions) followed by 12 jurisdictions that provide expedited residential permitting processing; and
- Table X-2 lists those most frequently practiced land use policies that support or incentivize increased affordable housing. The City of Lauderhill offers the most financial incentives to support affordable housing among the County's local jurisdictions. The Town of Davie currently provides the widest range of land use policies to encourage new residential investment.

A check ✓ by the jurisdiction indicates those affordable housing actions or related policies that are in place. It is important to note and recommended that several of the consortium cities either update their local affordable housing plan and/or the housing policies adopted as part of the jurisdiction's Comprehensive Plan.

Table X-1 – Fair Housing Actions Matrix: Financial Incentives and Administrative Measures

<b>Number of Participating Jurisdictions</b>	<b>10</b>	<b>10</b>	<b>7</b>	<b>6</b>	<b>4</b>	<b>5</b>	<b>10</b>	<b>8</b>

While each of these financial, administrative and land use policies and practices play a role in encouraging affordable housing opportunities to Broward County residents or home builders, it is also recommended that all Consortium cities and towns participate and/or enact and implement the following fair housing actions to further expand affordable housing opportunities.

**Action 1: Expand Dedicated Public Funding and Leverage Private Resources to Increase Affordable Housing Opportunities.**

There exist a wide range of existing and potential funding mechanisms in Broward County that need continued financial support from the County, City, private and nonprofit sectors including but not limited to:

- a. Supporting Broward County’s continued allocation of public funding towards the Broward County Affordable Housing Trust Fund.
- b. Expanding the resources allocated to the Broward County Housing Finance Agency to encourage its development and construction of dwelling units affordable to lower income households.
- c. Supporting the allocation of Community Redevelopment Agency (CRA) funding for affordable housing.
- d. Supporting policies that address flexible sources of “gap financing” for affordable housing, especially second mortgage programs.
- e. Expanding local funding and access to the Housing Finance Authority Mortgage Credit Certificate Program to help reduce home loan financing costs for qualified homeowners. This valuable program entitles recipients to a federal income tax credit in an amount of up to \$2,000 annually and each year they continue to live in the home financed under the program.
- f. Supporting the partnership between Broward County and South Florida Community Land Trust.

**Action 2: Promote Municipal Enactment of County Land Use Code Affordable Housing Incentives.**

The 2019 amendment to the County’s land use code that encourages affordable housing construction on commercial sites near major roads should be promoted and enacted by County municipalities. This change requires affordable housing where located in certain high traffic areas allowing developers a financial incentive from Broward County in return for an increase in revenue from the County’s transportation sales tax.

**Action 3: Expand Housing Counseling.**

Support foreclosure counseling workshops by HUD certified agencies and local banks and encourage local funding of foreclosure counseling/assistance programs and homebuyer education courses. This action includes expanding foreclosure protection and prevention workshops, seminars and information through the Broward County Human Rights Section to reduce the number of families at or near poverty levels. These seminars should also be offered

to current homeowners to ensure those at risk of losing their home can be assisted, educated and prevent foreclosure that could lead to homelessness.

**Action 4: Offer Local Incentives for Affordable Housing in Opportunity Zones.**

Explore financial and zoning incentives for the development of affordable rental housing on high density Opportunity Zone properties such as expanding fee waivers and bonus densities.

**Action 5. Expand Support for Homeless Service Providers and Homeless Housing Opportunities.**

It is important to continue to engage in public education to help residents understand the costs associated with an undersupply of affordable housing. Expanding outreach programs is a key component of helping homeless persons in making a transition into permanent housing.

The County and its cities should continue to expand the development of permanent supportive housing units. Through partnerships, the County could ensure that there is enough year around shelter space and permanent supportive housing options so that chronic or temporarily homeless persons are safely sheltered and receiving needed services. This requires Broward County and its municipalities to continue to support, if not increase support, to the Broward County Homeless Initiative Partnership in their effort to improve coordination between homelessness service providers.

**Action 6. Encourage Employer Assisted Housing.**

The County and its local jurisdictions should initiate an Employee Housing Assistance program for public employees in education and local government. This approach offers a combination “Housing Allowance Cafeteria Plan” that includes benefits that may be utilized for housing down payment assistance; phased forgivable loans tied to tenure; rental allowances and/or other cafeteria benefits incorporating housing support for public sector employees (c, d).

**Action 7. Expand Public Education Regarding Fair Housing Practices:**

It is critical to increase public awareness regarding rights and responsibilities under fair housing laws. The County and local nonprofits need to continue to educate and make realtors, bankers, and landlords aware of discriminatory housing policies and to promote fair housing opportunities for all County residents. These efforts should also include improving knowledge and awareness of the Fair Housing Act; related housing and discriminatory laws and regulations; and continue to educate and make residents more aware of their rights under the Fair Housing Act and the Americans with Disabilities Act (ADA).

**Action 8: Provide Tenant Information and Adopt Eviction Assistance Measures.**

It is recommended that Broward County prepare materials to inform tenants of their tenant rights. Many communities around the country have instituted programs that seek to address housing evictions in their communities such as Landlord/Tenant Handbooks that explain the rights and responsibilities of both the landlord and tenant; guidelines when entering into a new

lease; tips for tenants and landlords; and information on the eviction process. Broward County should also take formal action to prohibit discrimination by landlords against any applicants who use federal vouchers for housing.

**Action 9: Modify Construction and Rehabilitation Codes.**

The County and its cities, in cooperation with the Broward County Builder Officials and the local chapter of the Florida Home Builders Association, should identify and allow innovative construction methods that include new plumbing or electrical techniques that can contribute to lowering the cost of new housing. Also, allowing flexibility in rehabilitation codes can occur while maintaining protection of health and safety. These reforms can stimulate the rehabilitation and/or conversion of buildings to affordable housing.

**Action 10: Promote Municipal Enactment of County Land Use Code Affordable Housing Incentives.**

The 2019 amendment to the County’s land use code that encourages affordable housing construction on commercial sites near major roads should be promoted and enacted by County municipalities. The change requires affordable housing if located in certain high traffic areas allowing developers a financial incentive from Broward County in return for an increase in revenue from the County’s transportation sales tax. This action is a step towards enacting a more comprehensive model inclusionary zoning ordinance for Broward County local jurisdictions to follow.

**Action 11: Increase the effectiveness of local fair housing ordinances through stronger code enforcement mechanisms.**

Several of the County’s jurisdictions lack comprehensive residential code enforcement staff. Strengthening these efforts will better enable these cities to maintain their existing affordable housing supply.

## Conclusion

As this Analysis of Impediments to Fair Housing Choice has identified, Broward County and the Broward County HOME Consortium to face various challenges in their pursuit to achieve the goal of affirmatively furthering fair housing choice. In collaboration with the community residents, housing stakeholders, and the numerous non-profit and for-profit partners, the County and Consortium jurisdictions can build on recent improvements, local strengths, and opportunities to increase fair housing choice moving forward. The Fair Action Plan included in this AI can serve as an easily understandable roadmap – for both policymakers and the public – in order to focus efforts and advance fair housing choice in the near future.

## Broward County

### **Appendix B - Four-Factor Analysis for Limited English Proficiency Persons**

#### **HUD Entitlement Programs:**

**CDBG and HOME**

**Purpose:** In compliance with Executive Order 13166, Broward County has developed the following Four-Factor Analysis and Language Action Plan (LAP) for Limited English Proficiency (LEP) persons living in the County.

**History:** Under Federal law Title VI of the Civil Rights Act of 1964, discrimination was made illegal in programs that received federal financial assistance. In particular for LEP persons, it protects individuals on the basis of their race, color, or national origin. In certain situations, failure to ensure that persons who have LEP can effectively participate in, or benefit from, federally assisted programs may violate Title VI’s prohibition against race/ethnicity and national origin discrimination.

Persons who, as a result of their race/ethnicity and national origin, do not speak English as their primary language and have limited ability to speak/read/write, or understand English may be entitled to language assistance under Title VI in order to receive County services, benefits, and/or participate in sponsored programs.

**Four-Factor Analysis:** There is no specific method for ensuring compliance but undertaking a four-factor analysis, adoption of a Language Access Plan (LAP) for vital materials and making necessary translation will be considered “strong evidence” of compliance.

**Factor 1:** Determine the number or proportion of LEP persons in the eligible service population. HUD provides the following guidance for what documents should be provided and when:

Size of Language Group	Recommended Provision of Written Language Assistance
1,000 or more LEP persons in eligible population	Translate vital documents
>5% of eligible population and more than 50 are LEP persons	Translate vital documents
>5% of eligible population and 50 or less are LEP persons	Translated written notice of right to receive free oral interpretation of documents
5% or less of eligible population and less than 1,000 are LEP persons	No written translation required

**Factor 2:** The frequency with which LEP persons come in contact with the program

**Factor 3:** The nature and importance of the program, activity, or service

**Factor 4:** The resources available and costs to the recipient

Examples of language assistance includes but is not limited to oral interpretation, bilingual staff, telephone service lines interpreter, written translation services, notices to staff and recipients about the availability of LEP services, or referrals to community liaisons. When the four-factor analysis is complete the jurisdiction should produce a Language Access Plan and follow thru with the plan.

---

### Factor 1: Size of LEP Population

Overall, Broward County has a significant limited English proficiency population that may require translation services. In 2018, an estimated 289,349 individuals spoke English less than “very well.” The most common primary language spoken by LEP residents is Spanish. Given the large Hispanic population (over 25%) it is unsurprising that Spanish speaking households are very prevalent. Approximately 187,252 LEP residents speak Spanish, which is 65% of the LEP population. Additionally, 81,727 LEP residents primarily speak Indo-European languages, 14,288 speak Asian and Pacific Island Languages, and 6,082 speak other languages.

Due to the importance of HUD programs and the universal availability of some programs the entire jurisdiction was analyzed. Additional four-factor analyses should be conducted on a program basis with a more limited geographic range.

Language	Primary Language Spoken at Home		Limited English-Speaking Households		
	#	%	#	% of Total Households	% of Prim. Home Lang.
Population 5 years and over	1,797,580	--	289,349	16.1%	--
Spanish	467,357	26.0%	187,252	10.4%	40.1%
Other Indo-European	209,000	11.6%	81,727	4.6%	39.1%
Asian and Pacific Island	30,351	1.7%	14,288	0.1%	27.1%
Other	25,261	1.4%	6,082	<0.1%	24.1%

Source: 2014-2018 American Community Survey 5-Year Estimates (S1601)

### Factor 2: Frequency of Contact

Housing services require ongoing communication and needs to be available throughout the year. Depending on the program specifics, procedures will vary as detailed in the LAP. Race and Ethnicity beneficiaries are reported in the County’s annual Consolidated Annual Performance Report to HUD. In the following table, it shows the composition of households or individuals assisted in Broward County by entitlement program. Hispanic residents make up over half of CDBG participants and nearly one-quarter of HOME program participants.

**Racial and Ethnic Composition of Households/Individuals Assisted (2018 CAPER)**

	CDBG		HOME	
	#	%	#	%
White	968	81.6%	78	31.2%
Black or African American	208	17.5%	170	68.0%
Asian	11	1.0%	2	0.8%
American Indian or American Native	0	0%	0	0.0%
Native Hawaiian or Other Pacific Islander	0	0%	0	0.0%
<b>Total</b>	<b>1,187</b>	<b>--</b>	<b>250</b>	<b>--</b>
Hispanic	602	50.7%	60	24.0%
Not Hispanic	585	49.3%	190	76.0%

**Factor 3: Nature and Importance of the Program**

Per the “Department of Housing and Urban Development Final Guidance to Federal Financial Assistance Recipients Regarding Title VI Prohibition Against National Origin Discrimination Affecting Limited English Proficient Persons”, HUD programs play a critical role in the community and should rank high on the critical/non-critical continuum. The importance will vary depending on each program, but the housing department as a whole is critical.

**Factor 4: Available Resources**

Given the limited resources available, it is imperative that a cost/benefit analysis is done when considering translation efforts for each program. It is difficult to gauge whether a community’s participation (or lack thereof) is due to failed outreach efforts or if they generally do not have a need. However, efforts can be made to show compliance with Title VI.

In general, all documents should be available in Spanish and it would be incredibly beneficial if a staff member could also serve as a point of contact for the Spanish LEP community. The remainder LEP populations should be targeted on a project-by-project basis. The jurisdiction should also reach out to community leaders who may be able to provide translation services. Regardless, every language mentioned above should be made aware of their right to a free oral translation of documents upon request.

**Conclusion:**

To assist in showing strong evidence for compliance with Title VI’s prohibition against discrimination, Broward County shall produce a thorough Language Access Plan. This plan should provide guidance for the creation of translated documents on a program-by-program basis and

for the division as a whole. Particular care should be taken to ensure documents are prepared ahead of time for any disaster relief to minimize delays in service for households harmed by hurricanes or similar natural disasters

**Language Access Plan:**

As a result of the Four-Factor Analysis, Broward County has determined persons with limited English proficiency who primarily speak Spanish are in-need of language assistance. For this purpose, the County has identified the following types of language assistance to be provided as needed throughout HUD entitlement programs CDBG and HOME:

- All public notices and published citizen participation advertisements will include a statement that services and program materials are available in Spanish upon request.
- All citizen participation notices will include a statement that translators will be available at public meetings upon prior request.
- If needed, a translator may be retained to provide oral translation at public meetings and hearings, and also during the implementation of the project activities (as needed for housing and public services).

Additionally, individual projects shall take into account the LEP populations living within the project area to ensure assistance is provided for LEP residents speaking languages other than Spanish.
